RI TRANSPARENCY REPORT

2020

The J.W. McConnell Family Foundation

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.4 Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

Selection: we require all prospective managers to explain their ESG processes, and their expected growth in this area, if any. We integrate this consideration into our appointment process.

Appointment: We require and expect from managers to incorporate ESG into their investment process and to report on ESG metrics and developments. Provided other criteria are also met for selection, we will appoint mandates to managers with the strongest ESG strategies in place.

Monitoring: We monitor social and environmental impact regularly, as we do ESG practices. Rather than having standardized indicators, we consider metrics that are most relevant to each individual investment.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

The Foundation's investment beliefs are:

- 1) Total return: based on the concept of total return being composed significantly of investment income rather than capital gains.
- 2) Low volatility and inflation protection: to match the generally risk averse nature of the Foundation and to maintain purchasing power over the long-term.
- 3) Growing dividends: for long-term growth.
- 4) Responsible investing: incorporating environmental, social and governance (ESG) factors in its decision-making is fundamental to conducting comprehensive investment assessments and for managing risks and opportunities and all investments must be consistent with the Foundation's philanthropic mission.

The overall investment strategy described in detail in the publicly available SIPP. The Investment Committee has an advisory role and recommends policies and the Board retains decision-making authority.

In our risk management, we proactively attempt to mitigate compliance, credit, currency, diversification, inflation, leverage, liquidity, market, regulatory and volatility risks, in addition to having oversight over emerging risks and ESG issues.

External managers are responsible for voting proxies on behalf of the Foundation, with ESG factors being given the highest consideration.

For the portion of our portfolio allocated to Impact Investments, we have more stringent environmental and social screening requirements outlined in a distinct Impact Investment Policy.
