

CLIMATE TRANSPARENCY REPORT 2020

EOS Investment Management Ltd

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-DFEA55DE-BCA8-4C33-BF79-870C9F81712F/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

Investment policy

SG 01	Mandatory	Public	Core Assessed	General
-------	-----------	--------	---------------	---------

New selection options have been added to this indicator. Please review your prefilled responses carefully.

SG 01.1 Indicate if you have an investment policy that covers your responsible investment approach.

SG 01 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
----------	---	--------	-------------	---------

SG 01.6 CC Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Yes

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

EOS IM operates two primary investment strategies. The investment vehicles invested in clean energy are focussed on the delivery of the economies requirements and demands for electricity. The opportunity arises from the combined need to both generate electricity and the transition to a significant reduction in the worlds current carbon footprint. EOS IM is a cutting edge market leader in the global clean energy sector with its planned development of greenfield sites. Through the expertise and knowledge which has been developed by EOS IM, the investment vehicles have the ability to generate electricity in an unsubsidised environment. Therefore, encouraging the increased take up of clean energy for economic and as well as environmental purposes. EOS IM sees the requirement for small and medium sized companies to meet a transition in both the legislative requirements (with an ESG focus), technical innovations which reduce environmental impacts (and more efficient) and the ESG demands of clients. The opportunities also arise from the ability of EOS IM to mentor firms through these necessary transitional and evolutionary changes, along with selecting management teams that are flexible. We see the larger industry risks arising in firms that can't adapt to these necessary transitional changes.

No

SG 01.7 CC Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

Describe the associated timescales linked to these risks and opportunities.

EOS IM operates long-term investment funds and sees the timescale going between 5 and 10 years depending on the strategy.

No

**SG 01.8
CC**

Indicate whether the organisation publicly supports the TCFD?

- Yes
- No

**SG 01.9
CC**

Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

- Yes

Describe

The ESG ethos, including countering climate change is central to the operation and objectives of EOS IM. The responsibility and lead of this approach is held by both the senior management team, from Board level down and with the investment teams, who deliver the results. The information about the benefits of the ESG approach are shared with all members of the global EOS IM Group's team. Thus encouraging all individuals to participate and contribute to this goal. The policy is delivered through a number of methodologies including the incorporation of ESG within the investment cycle and the utilisation/support of external expert advisors.

- No

**SG 1.10
CC**

Indicate the documents and/or communications the organisation uses to publish TCFD disclosures.

- Public PRI Climate Transparency Report
- Annual financial filings
- Regular client reporting
- Member communications
- Other
- We currently do not publish TCFD disclosures
