RI TRANSPARENCY REPORT

2020

EFA Group

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

EFA has adopted a negative screening strategy to incorporate ESG standards into our investment process and decision making process. This is done through the ESG evaluation questionnaire. The implementation of ESG factors into our portfolio construction and investment strategy helps us to measure the sustainability and ethical impact of our borrowers.

Our approach is to highlight and raise awareness of ESG issues to our portfolio companies. We believe by implementing such a screening and assessment process, we can trickle down the importance of managing ESG concerns and having the right policies and procedures in place to mitigate these risks. Ultimately, we hope that this ripple effect can lead to the development of a more sustainable global financial system. In implementing these factors, EFA Group contributes to the development of a more sustainable global financial system and raise the awareness of ESG standards as a borrowing criteria among SMEs.

EFA's private debt strategy contributes to a positive social impact, through financing of its borrowers. By funding these SMEs, known as the engines of economic growth, we are supporting jobs creation, increase of productivity, and improvement of living standards. Our strategy impacts real lives of families.

Our approach is to highlight and raise awareness of ESG issues to our portfolio companies. We believe by implementing such a screening and assessment process, we can trickle down the importance of managing ESG concerns and having the right policies and procedures in place to mitigate these risks. The process is not meant to be punitive to our borrowers as we would like to give access to financing for these companies which can lead to the development of a more sustainable global financial system.
