CLIMATE TRANSPARENCY REPORT

2019

PKA

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2019 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2019 Reporting Framework response. The full Public Transparency Report is available here (https://reporting.unpri.org/surveys/PRI-reporting-framework-2019/-279CA44D-4CA0-43DB-BDFA-CB2C0D60BC2A/00000000-0000-0000-0000-000000000000/doc/2/-%7C%7C*complete*%7C*public*/Merged/). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2019 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

Other role, specify (1)

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

SG 07.6 CC	For board level roles for which have climate-related issues oversight/accountability or implementation responsibilities, indicate how these responsibilities are executed.
-----------------------------	--

The boards are updated 5 times a year on climate related opportunities/risks. They also receive dedicated papers discussing PKA's climate change strategy. PKA's investment strategy makes specific references to climate related opportunities/risks and the Paris-agreement, which is guiding PKA's decisions.

PKA's ambition is to invest 10% of AUM in climate related projects (real assets) and the boards are continuously updated on the progress.

SG 07.8 CC	Explain how the organisation engages external investment managers on the TCFD recommendations and its implementation.
-----------------------------	---

- Incorporation of TCFD in Annual Report
- Incorporation of TCFD in regular client reporting
- Request that investment managers complete PRI Climate indicators
- Request responses to TCFD Fund Manager questions in the PRI Asset Owner guide

ESG issues in asset allocation

SG 13	Mandatory	Public	Descriptive	PRI 1
--------------	------------------	---------------	--------------------	--------------

SG 13.1	Indicate whether the organisation undertakes scenario analysis and/or modelling and provide a description of the scenario analysis (by asset class, sector, strategic asset allocation, etc.).
----------------	--

- Yes, to assess future ESG factors

	Describe
--	----------

We conduct scenario analysis before investing in larger ESG projects such as our exclusion of coal and large investments in e.g. windmills and microfinancing. We use scenario analysis to assess the future value of the investments and thereby determine if it would be profitable as well as sustainable

- Yes, to assess future climate-related risks and opportunities

	Describe
--	----------

Same as ESG factors: We assess future climate related risks and opportunities through scenario analysis to determine the long-term value of a potential investment.

No, not to assess future ESG/climate-related issues

SG 13.2	Indicate if your organisation considers ESG issues in strategic asset allocation and/or allocation of assets between sectors or geographic markets.
----------------	---

	We do the following
--	---------------------

- Allocation between asset classes
- Determining fixed income duration
- Allocation of assets between geographic markets
- Sector weightings
- Other, specify
- We do not consider ESG issues in strategic asset allocation

Initial assessment

	Describe
--	----------

We use scenario analysis as part of our initial assessment to gain an idea of how the market is going to evolve in relation to climate risks and opportunities.

Incorporation into investment analysis

	Describe
--	----------

We incorporate the initial assessment/scenario analysis into investment analysis to assess whether the investment will prove to be profitable in the long-term.
