RI TRANSPARENCY REPORT

2019

International Farming Corporation

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

International Farming Corporation ("IFC") focuses on the acquisition of diverse farmland and agricultural assets with the potential to create new and optimized investor value through improved crop mixes, remediation, capital expenditure, active management, the application of best practice, and innovative technology. We seek to create new value in the agricultural communities in which we operate and employ principles and practices that leave the land better than we found it. We are currently refining our approach to quantifying our impact and success in achieving these goals.

SG 03.1

Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2

Describe your policy on managing potential conflicts of interest in the investment process.

IFC is sensitive to conflicts of interest in its investment activities and has built governance mechanisms into its decision-making processes to prevent conflicts in the first instance and to address the conflicts that do arise. IFC's Investment Committee is comprised of members of management (and one outside advisor) that are not members of the Acquisitions team. We believe this enables and encourages objective decision-making by the Investment Committee. In addition, the limited partnership agreements for the funds managed by IFC contain provisions establishing limited partner advisory boards (the "Advisory Boards") and requiring the consent of the Advisory Boards in certain conflict situations. IFC communicates with each Advisory Board on a quarterly basis and on an ad-hoc basis as necessary to timely address any issues or opportunities requiring the Advisory Board's input or consent.

SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

IFC policies, as they relate to in-house management and initiatives, are discussed and agreed upon by the Executive Committee. Department Heads and VPs are tasked with instituting these policies and bringing their intended goals to fruition.

Investor Relations maintains accountability for communicating ESG commitments to investors. Moreover, as the primary interface between investors and the rest of IFC, Investor Relations is able to bring to IFC's management team recommendations and requests from investors for the implementation of new ESG-related policies and initiatives within the firm.

Each Department, as directed by their Head, is responsible for enforcing the policies related to their workflows. Activities that come under our various stewardship policies include property sourcing, due diligence, acquisitions, asset management, lessee commitments, data management and activity tracking, remediation, and asset dispositions.

Internal committees are actively consulted and their consent is required for all major business decisions, ensuring proper discretion, disclosure, and governance is exercised for the health and stewardship of all stakeholders.
