# RI TRANSPARENCY REPORT

## 2020

Daintree Capital

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Our core ESG principles are: **Sustain Returns** (a coherent ESG policy will help to identify and monitor companies while also improving, or at least not sacrificing, investment returns), **Manage Risks** (by having a robust ESG policy, we will be able to identify and manage a broader set of risks than using traditional analysis alone) and **Invest for Good** (by identifying appropriate opportunities such as green bonds to direct capital toward environmental and social initiatives that will have tangible impacts on people's lives). We seek to achieve these principles via a mixture of screening/exclusions, focussed interaction and engagement with companies, and a clear set of criteria for analysing potential green bond investments.

**FI 01.2** Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

We have utilised a mixture of screening methods and integration for Corporate and Financial bonds because we have access to sufficient data that allows us to implement a robust and repeatable process. We undertake a mixture of negative screens and norms-based screening, with the norms-based screening having been client-led. We implement a reduced form of integration when it comes to Securitized assets, due to limitations in relevant data. Securitized assets are typically residential mortgage backed securities or asset-backed securities secured by consumer loans.

**FI 03.1** Indicate how you ensure that your ESG research process is robust:

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

**FI 03.2** Describe how your ESG information or analysis is shared among your investment team.

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, 'tear sheets', or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions
- Other, specify
- None of the above

<b>FI 04.2</b>	Describe your approach to screening for internally managed active fixed income
----------------	--

In terms of negative screening, we have two main classes. The first is full exclusion, which include norms-based factors (currently whaling and cannabis), and for industries such as tobacco. The second is exclusion subject to a revenue threshold, which in our case has been set at no more than 5% of total revenue. Examples include alcohol production, gambling, fossil fuel extraction and uranium extraction.

**FI 12.2** Please provide more detail on how you review E, S and/or G factors in your integration process.

Corporate (financial)

The review starts before a new issuer is added to the portfolio, with a thorough screen for a range of ESG risk factors. Once included, we have quantitative and qualitative measures to monitor ESG performance. An example of a quantitative measure includes following the trend in rating scores provided by our third-party researcher. A qualitative measure includes monitoring of newsflow for that particular issuer or the sector to which it belongs.

Corporate (non-financial)

The review starts before a new issuer is added to the portfolio, with a thorough screen for a range of ESG risk factors. Once included, we have quantitative and qualitative measures to monitor ESG performance. An example of a quantitative measure includes following the trend in rating scores provided by our third-party researcher. A qualitative measure includes monitoring of newsflow for that particular issuer or the sector to which it belongs.

Securitised

We review the purpose of the loan underlying the tranches of a securitised asset. For example, we identified a tranche of an ABS that funds rooftop solar installations, which helped us build a case for why that tranche should be included in our portfolios as a "green" asset.
