RI TRANSPARENCY REPORT

2020

UEthical

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Ethical Investment Process - U Ethical's investment process ensures that all investment decisions are in keeping with our vision and that they promote careful financial stewardship. This is achieved through the application of positive and negative screens, and engagement with companies - together with a focus on competitive economic returns and sustainability.

Positive Screening

Our positive screen seeks out companies that promote human welfare and dignity or environmental sustainability. We screen positively for sectors such as: clean energy, sustainable agriculture, recycling and reuse, employment, community and education services and health care. We assess our positive thematic companies on their net contribution to the achievement of the UN Sustainable Development Goals.

U Ethical avoids investing in companies that:

- cause unacceptable damage to the natural environment
- infringe on human rights
- support oppressive regimes
- cause or perpetuate injustice and suffering
- have unacceptable occupational health and safety practices

Our negative screening approach means we systematically exclude the following industries due to their inherent negative impacts:

- Fossil fuels (power generation, exploration and extraction)
- Uranium
- Armaments
- Predatory lending
- Gambling
- Pornography and adult entertainment
- Animal cruelty
- Alcohol production
- Tobacco manufacturing

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

In practice, the majority of investments are in companies that are considered to be neutral in terms of the positive and negative screens. Such investments are made on the basis of fundamental investment criteria, assisting U Ethical to exercise good stewardship, and provide a reliable source of income and capital growth.

We apply a materiality threshold of 5% exposure across our exclusion criteria, as we recognise it can be challenging to screen all negative activity with 100% conviction. In addition, where companies have an

insignificant exposure to an excluded activity, this may be outweighed by other positive aspects of their business.

We also work with peers and industry bodies to promote the ethical approach with participation in working groups, media releases and sponsorships. We are currently involved in numerous collaboration efforts with peers and industry groups to collectively lobby companies.

Our advocacy is applied in recognition of our limited resources. We have traditionally lobbied and sought explanation from industry around two or three critical issues. It is our conscious effort to make a difference.

We actively vote our proxies (See Voting Policy) and incorporate strong gender diversity targets and remuneration caps. We also seek to actively engage with companies on ethical issues and look to effect positive change via direct engagement and collaboration. We have a documented set of principles stipulating when and how we engage with companies.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

To ensure compliance with our ethical and environmental values, qualitative esg analysis is conducted across all new holdings prior to investment. Companies are screened for their performance against material environmental, social and governance factors prior to investment. Along with internal research, U Ethical utilises MSCI ESG research, broker reports, ISS governance platform, news sources and other relevant sources. The relevant ESG factors will vary by industry and company, we use the MSCI ESG scorecard data for each security to ensure the most material risks for each individual company are considered. Qualitative ESG analysis also helps us to ascertain whether the company has any practices or products which could breach our negative screening policy.

We choose this strategy to ensure that only companies with strong ESG credentials come through in our investable universe - that is companies with ESG ratings BBB in the International context, B in the domestic Australian context. This is the most appropriate strategy for us - due to limited resource we lean on available, quantifiable ESG ratings where possible.

LEI 01.3

If assets are managed using a combination of ESG incorporation strategies, briefly describe how these combinations are used. [Optional]

We incorporate ESG analysis and also ESG controversy screening. U Ethical monitors ethical controversies to ensure that companies continue to comply with the Ethical Investment Policy. The team uses a range of sources to monitor controversies including MSCI ESG Manager alerts, ISS governance research, broker reports, news publications, Factset, industry bodies (RIAA, PRI, ACCR) and relationships with non-for-profit organisations such as the Uniting Church of Australia Justice for International Mission Unit.

All companies with a 'Very Severe' MSCI controversy rating either ongoing, or within the last 3 years, are likely to be screened out. If a current holding receives a Very Severe controversy rating this is discussed in our Portfolio Management Meeting. Any proposed addition of a company to the U Ethical exclusion list is subject to Investment Committee approval, although companies may be divested following discussion at the quarterly Portfolio Management Meeting.

We also run daily alerts on controversies - both holdings and the wider investable universe. This is monitored by both the Investment Team and Ethics & Impact Manager.

We publish an excluded stock list on to the website alongside the reason for exclusion, which includes companies excluded due to either their industry, practices or controversies.

(A) Implementation: Screening

LEI 04	Mandatory	Public	Descriptive	PRI 1
--------	-----------	--------	-------------	-------

LEI 04.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

Our negative screen evaluates a company's products, services and practices to ensure they are not detrimental to society or the environment. U Ethical avoids investing in companies that:

- cause unacceptable damage to the natural environment
- infringe on human rights
- support oppressive regimes
- cause or perpetuate injustice and suffering
- have unacceptable occupational health and safety practices including disregard for minimum wage laws.

U Ethical also systematically excludes companies with operations in the following areas due to their inherent negative impacts:

- Oil, coal, gas (power generation, exploration, extraction)

- Uranium for non-medical uses
- Armaments
- Predatory lending
- Gambling
- Pornography and adult entertainment
- Animal cruelty
- Alcohol production
- Tobacco manufacturing

We recognise that there are occasions when companies inadvertently violate these principles and make genuine efforts to rectify this. Furthermore, we may choose not to exclude a company where a contravention of the principles constitutes less than 5% of the company's revenue or earnings. In such instances, the contravention may be outweighed by significantly positive factors.

- Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description
<p>U Ethical screen out companies with below average ESG ratings across all portfolios. U Ethical recognises that ESG ratings are relative to sector peers and can be driven by policies and reporting capabilities rather than specific actions. Therefore, external ESG ratings are complemented by internal assessments to ascertain whether the company meets our ethical standards.</p> <p>U Ethical also excludes a number of products and practices from its investable universe, which are deemed to be harmful to either society or the environment.</p> <p>Positive companies are assessed through a UN Sustainable Development Goals framework. All portfolios strive for at least 10% exposure (although often it's much higher) to companies significantly contributing to the achievement of the goals.</p>

- Norms-based screening

Screened by

- UN Global Compact Principles
- The UN Guiding Principles on Business and Human Rights

Companies are screened for their performance against relevant environmental, social and governance factors prior to and throughout investment. Along with internal research, U Ethical utilises third-party provider research, broker reports, governance platforms, news sources and many other relevant sources. The relevant ESG factors will vary by industry and company, we use a materiality scorecard for each security to ensure the most material risks for each individual company are considered.

Engagement principles:

We will strive to write to domestic companies soon after investing to inform them of our values, ethical investment policy, and voting policy and guidelines. Throughout the voting season, U Ethical will aim to engage with companies as and when we feel that we can genuinely effect positive change.

Board diversity - Whilst our board diversity expectations are not explicitly outlined in the voting policy, diversity is a material factor to U Ethical which we champion in our advocacy efforts. We will use our power as shareholders to vote and engage with companies who do not meet the ACSI recommended 30% female diversity threshold, following the process outlined in our engagement principles.

Shareholder resolutions - U Ethical votes all shareholder resolutions, considering each on a case by case basis in relation to the U Ethical values and ensuring they are in the best interests of our clients. Where votes are cast against management, U Ethical will aim to write to the company to outline our votes cast, and why.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

To ensure compliance with our ethical and environmental values, negative screening and esg analysis is conducted across all new holdings prior to investment, and current holdings at regular intervals. Products and practices which we believe to be detrimental to either the environment or society are screened out of our investable universe.

Companies are also screened for their performance against material environmental, social and governance factors prior to investment. Along with internal research, U Ethical utilises MSCI ESG research, broker reports, ISS governance platform, news sources and many other relevant sources. The relevant ESG factors will vary by industry and company, we use the MSCI ESG scorecard data for each security to ensure the most material risks for each individual company are considered. Qualitative esg analysis helps us to ascertain whether the company has any practices which could breach our negative screening policy.

Our negative screening ensures we invest in line with our ethical values and those of our clients. We choose these strategies to ensure that only companies with strong ESG credentials come through in our investable universe. This is the most appropriate strategy for us due to limited resource. We lean on available, quantifiable ESG ratings where possible.

FI 04.2**Describe your approach to screening for internally managed active fixed income**

Our negative screen evaluates a company's products, services and practices to ensure they are not detrimental to society or the environment. U Ethical avoids investing in companies that:

- cause unacceptable damage to the natural environment
- infringe on human rights
- support oppressive regimes
- cause or perpetuate injustice and suffering
- have unacceptable occupational health and safety practices including disregard for minimum wage laws.

U Ethical also systematically excludes companies with operations in the following areas due to their inherent negative impacts:

- Oil, coal, gas (power generation, exploration, extraction)
- Uranium for non-medical uses
- Armaments
- Predatory lending
- Gambling
- Pornography and adult entertainment
- Animal cruelty
- Alcohol production
- Tobacco manufacturing

We recognise that there are occasions when companies inadvertently violate these principles and make genuine efforts to rectify this. Furthermore, we may choose not to exclude a company where a contravention of the principles constitutes less than 5% of the company's revenue or earnings. In such instances, the contravention may be outweighed by significantly positive factors.

(C) Implementation: Integration

FI 10	Mandatory	Public	Descriptive	PRI 1
-------	-----------	--------	-------------	-------

FI 10.1	Describe your approach to integrating ESG into traditional financial analysis.
---------	--

U Ethical's investment process ensures that all investment decisions maintain our vision to improve the world through the power of purposeful investing, as well as promoting careful financial stewardship. This is achieved through the application of positive and negative screens, and engagement with companies - together with a focus on competitive economic returns and sustainability.

We initially integrate ESG analysis within our process through discussions with the issuer, looking at the company through an ESG lens, comparing it to peers, discussing any continuous improvement efforts they have in place relevant to ESG metrics. We then assess how this may improve their financial performance / standing.

Country exposure may raise material ESG risk. For example, a supranational bank could be supporting infrastructure projects that benefit communities, but due to corrupt governments within the countries in which these are built, there could be corruption in the tendering process.

FI 10.2	Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.
---------	---

SSA

These would primarily be country specific risk. Second-order effects are also considered. For example, if the country in which they are lending to does not have sustainable practices then by default a lot of the loans they provide for a project will not be carried out in a sustainable manner.

Corporate (financial)

We look at how they support social and environmental endeavours (giving discounted loans for SDG aligned projects as an example). In relation to Governance metrics, we look at compensation but primarily how they have responded to changes in regulation and compliance.

Corporate (non-financial)

A wider set of ESG metrics are relevant to Corporate (non-financial). For example, with REITS we may look at what they are doing to improve the NABERS rating of their buildings and how they are enforcing green leases onto their tenants.
