RI TRANSPARENCY REPORT

2020

Aktie-Ansvar AB

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Aktie-Ansvar is one of Sweden's oldest Fund Management Company's established in 1965. Aktie is Swedish for Equity and Ansvar is Responsibility. Responsible-Equity would in other words be the closest English interpretation of the brand name.

The founders, back in 1965, were the Swedish part of Independent Order of Good Templars and what is today the Uniting Church of Sweden, Equmeniakyrkan. It's no coincidence responsible investments have been a part of Aktie-Ansvar since start.

Aktie-Ansvar has currently nine funds which consist of various assets such as equities, bonds, hedge funds and alternative strategies. Today Aktie-Ansvar is a part of the Garantum group.

SG 01.4 Describe your organisation’s investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Aktie-Ansvar has as the primary objective to give shareholders the best possible risk-adjusted return. To be able to deliver that, we consider that certain investment strategies are necessary. Our equity funds and fixed income comply with ethical investment principles. Due to these principles, our funds will not invest in companies with sales exceeding 5 % derived from alcohol, tobacco, weapons, games or pornography. Thereby, companies that do not fulfill these requirements will not be invested in. Environmental, social and governance factors may have an impact on the investment decision. However, our funds that trade with different forms of beta exposures, such as exchanged traded funds or commodity certificates, do not use this ethical exclusion screening.

In cases where other asset management companies published relevant analysis relating to equity-based investment principles, these are considered as well in the investment process. One example of these are so called black listed companies that violate international standards for the environment, human rights, employee rights and anti-corruption.

SG 01.6 CC Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation’s investment time horizon.

Yes

No

Describe why your organisation has not yet gone through a process to identify transition and physical climate-related risks and opportunities.

Aktie-Ansvar AB do not apply a general overall strategy for all investment decisions when it comes to climate-related risks and opportunities. In our Swedish and European equity funds there is no investments in companies within the oil, gas and coal industry. Some investments that are being done is due to good opportunities for the future based on climate-related risks. However, this is very individual depending on each case.

To exemplify, our Swedish equity fund invests in a company called Scandi Standard, which is a producer of chicken-based food products. In this particular case we see an opportunity as it is both more climate-friendly and healthier than bovine animals.

SG 01.8 CC Indicate whether the organisation publicly supports the TCFD?

Yes

No

Explain the rationale

.Our ambition is to publicly support the TCFD in the near future.

SG 03.2	Describe your policy on managing potential conflicts of interest in the investment process.
----------------	---

Aktie-Ansvar has a conflict of interest policy covering a broader aspect of interest, not solely within the investment process. Identified areas of interest of conflicts is stated in the policy. For 2019 it was between costumers, between costumers and the company and between costumers and people close to the company.

All conflicts of interest must be identified and handled either by mitigation or by accepting and disclosure.

The board of directors of Aktie-Ansvar has decided that conflict of interest should be a permanent topic that are dealt with on all board meetings. This in order to have the issue top of mind and to reduce the risk of missing any relevant conflict of interest.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

It is the portfolio managers responsibility for implementing Aktie-Ansvars policies when it comes to the main ESG strategies. Our screening strives to identify risk factors as early as possible to prevent us from investing in companies which does not comply with our ethical guidelines. ESG factors such as social factors are used in the screening criteria. This by excluding companies that have more than a turnover of 5 % arising from alcohol, tobacco, weapons, gambling, pornography and fossil fuel. Other ESG strategies that has been incorporated during the reporting year is described shortly below:

ESG aspects are taken into account in the corporate analyzes and investment decisions, but does not have to be decisive for which companies that funds are investing in. When material on ESG factors are missing for a possible investment prospect, Aktie-Ansvar acts upon this and starts a dialogue about these concerns. The portfolio managers thereby request ESG information if there is a lack of it in the regular reporting and information given.

Also, Aktie-Ansvar has internal rules for managing voting rights at annual meetings in the companies that we are investing in.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

As described earlier Aktie-Ansvar has a long history as an ethical manager not investing in weapons, alcohol, tobacco, gambling and pornography related companies. To clarify, negative screening is done in the funds where we have direct securities holdings. For our Swedish and European equity funds, we also exclude companies that are related to oil, gas and coal.

- Positive/best-in-class screening
- Norms-based screening

LEI 04.2

Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.

The criteria, not to invest in these kind of companies, are consistent. The screening is done on continues basis since a portfolio company may change its line of business.

The unit holders are informed of any relevant changes made through the policy of responsible investment. The latest version of the policy is always published at Aktie-Ansvars's website.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

In all funds with direct underlying's we use negative screening in order to comply with our policy, which states that we do not invest in companies with a turnover exceeding 5 % arising from alcohol, tobacco, weapons, gambling or distribution of pornography. Neither do we invest in companies that have a turnover exceeding 0% from production of pornography.

Furthermore, ESG factors are included and considered in the analysis and the decision-making process related to investments and may contribute to both inclusions and exclusions.

FI 03.1 Indicate how you ensure that your ESG research process is robust:

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

FI 03.2 Describe how your ESG information or analysis is shared among your investment team.

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, ‘tear sheets’, or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions

(C) Implementation: Integration

FI 10	Mandatory	Public	Descriptive	PRI 1
-------	-----------	--------	-------------	-------

FI 10.1 Describe your approach to integrating ESG into traditional financial analysis.

ESG information gathered is included in the analysis and investment decision making process. ESG factors play a role when investing, depending on how the risks and opportunities appear for every specific company and sector.

Hence ESG factors are taken into account in corporate analysis in an integrated way along with other factors of importance for the decision making. Therefore ESG factors for which we do not have negative/exclusion criteria are part of the investment process, but do not necessarily result in exclusions. An ESG factor could also be one of the main reasons for inclusion.

FI 10.2 Describe how your ESG integration approach is adapted to each of the different types of fixed income you invest in.

Corporate (financial)

Before an investment decision is made, the portfolio manager performs individual research. Data or information are collected from annual reports or external credit analysis.

If available, data supplied through Bloomberg are used. Also research made by counterparties is used. The most important ESG factors of an issuer are captured in short internal notes/bullets. Risks and opportunities including the ESG related ones are considered. If there are high risks related to an ESG factor, for which the investor is not expected to be compensated through the risk premia, an investment is not likely to take place. Also, if there is a major ESG related credit strength identified, it could be supportive for the investment.

Within the group Financials we look for different ESG factors depending on the type of company, but governance would be important in all cases. For instance, in the case of banks their lending practices and ethics are of interest, along with their compliance with regulations. For real estate companies energy efficiency and purchase practises are of particular interest as well as their sustainability thinking when it comes to urban planning etc. In the case of investment companies their holdings are analyzed according to type of company.

Corporate (non-financial)

Before an investment decision is made, the portfolio manager performs individual research. Data are collected from annual reports or external credit analysis.

If available, data supplied through Bloomberg are used. Also research made by counterparties is used. The most important ESG factors of an issuer are captured in internal notes/bullets. The risks and opportunities including the ESG related ones are considered. If there are high risks related to an ESG factor, for which the investor is not expected to be compensated through the risk premia, an investment is not likely to take place. Also, if there is a major ESG related credit strength identified, it could be supportive for the investment.

The ESG factors of most interest varies with the type of company. For instance, in the case of a sector such as mining, environmental factors could be the most important ESG factors whereas in another sectors it could be other factors. Governance would however be important in all cases.

FI 12.2 Please provide more detail on how you review E, S and/or G factors in your integration process.

Corporate (financial)

Our approach is based on a mix of quantitative data and qualitative judgement. Many ESG risks are associated with reputational risks and as such are important for the future of the companies/institutions.

Company reports and counterparty research notes are used. Where available data supplied by Bloomberg are used. Attendance at company presentations gives the opportunity to ask questions directly to management.

Governance is considered to generally be the most important factor as it defines the ability to do well on E and S as well. The board of directors/management and their track record are of importance.

ESG factors will receive different level of attention depending on the level of impact relative to other credit risks and strengths regarding the issuer. Furthermore, we differentiate the type of risks we focus on depending on the nature of the issuer's business activities, geographic presence etc. For instance, in the case of banks their governance and level of compliance will be given priority.

Corporate (non-financial)

Our approach is based on a mix of quantitative data and qualitative judgement. Many ESG risks are associated with reputational risks and as such are important for the future of the companies.

Company reports and counterparty research notes are used. Where available data supplied by Bloomberg are used. Attendance at company presentations gives the opportunity to ask questions directly to management.

The ESG factors will receive different level of attention depending on the impact relative to other credit risks and strengths. The ESG factors of most interest will vary with the type of company. In the case of a company in a sector such as mining, environmental factors could be the most important ESG factors whereas in another sectors it could be other factors. For companies active in regions with a high degree of corruption more emphasis need to be placed on S-related factors such as work practices and code of conduct when doing business. In sectors with dangerous activities, we put more emphasis on work safety and look for data on that. Governance would be important in all cases as it defines the ability to do well on E and S as well. The board of directors/management and their track records are of importance.
