

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-16BB29B7-305A-4AD8-8284-5AC9124183A6/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

Investment policy

SG 01	Mandatory	Public	Core Assessed	General
-------	-----------	--------	---------------	---------

New selection options have been added to this indicator. Please review your prefilled responses carefully.

SG 01.1 Indicate if you have an investment policy that covers your responsible investment approach.

SG 01 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
----------	---	--------	-------------	---------

SG 01.6 CC Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Yes

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

Infrastructure strategy is based on market opportunity in relation to climate change mitigation agenda. The core focus of the fund is to make greenfield investment into renewable energy projects that enable reduction of greenhouse gas emissions.

No

SG 01.7 CC Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

Describe the associated timescales linked to these risks and opportunities.

Climate change mitigating investments are linked to European Commission and country level targets within investment geography to achieve carbon neutrality by 2050.

No

SG 01.8 CC Indicate whether the organisation publicly supports the TCFD?

Yes

No

SG 01.9 CC Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

Yes

	Describe
--	----------

BaltCap aims to track the following indicators (before and after investment is completed) that can measure effectiveness of the climate change mitigation goals implementation:

- 1) Fossil Fuel type consumption tonnes/a
- 2) Fossil Energy consumption tonnes/a
- 3) Electricity consumption MWh/a
- 4) Waste production t/a
- 5) Waste re-circulated t/a
- 6) Renewable energy prod/cons. MWh/a
- 7) SLCP (Short Lived Climate Pollutants) t/a

No

SG 1.10 CC	Indicate the documents and/or communications the organisation uses to publish TCFD disclosures.
-----------------------	---

- Public PRI Climate Transparency Report
- Annual financial filings
- Regular client reporting
- Member communications
- Other
- We currently do not publish TCFD disclosures

Governance and human resources

SG 07 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
-----------------	--	---------------	--------------------	----------------

SG 07.5 CC	Indicate the roles in the organisation that have oversight, accountability and/or management responsibilities for climate-related issues.
-----------------------	---

	Chief Executive Officer (CEO), Chief Investment Officer (CIO), Chief Risk Officer (CRO), Investment Committee
--	---

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

	Other Chief-level staff or heads of departments
--	---

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

Portfolio managers

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

SG 07.7 CC	For management-level roles that assess and manage climate-related issues, provide further information on the structure and processes involved.
-----------------------------	--

Investment directors are responsible for financing renewable energy and energy efficiency projects which reduce GHG emissions and mitigate climate change. Investment directors are following three-step decision making process and get the final approval to proceed at the Investment Committee level.

ESG issues in asset allocation				
---------------------------------------	--	--	--	--

SG 13	Mandatory	Public	Descriptive	PRI 1
--------------	------------------	---------------	--------------------	--------------

SG 13.1	Indicate whether the organisation carries out scenario analysis and/or modelling, and if it does, provide a description of the scenario analysis (by asset class, sector, strategic asset allocation, etc.).
----------------	--

- Yes, in order to assess future ESG factors
- Yes, in order to assess future climate-related risks and opportunities
- No, our organisation does not currently carry out scenario analysis and/or modelling

SG 14	Mandatory to Report Voluntary to Disclose	Public	Additional Assessed	PRI 1
--------------	--	---------------	----------------------------	--------------

SG 14.1	Some investment risks and opportunities arise as a result of long term trends. Indicate which of the following are considered.
----------------	--

- Changing demographics
- Climate change
- Resource scarcity
- Technological developments
- Other, specify(1)
- Other, specify(2)
- None of the above

SG 14.2	Indicate which of the following activities you have undertaken to respond to climate change risk and opportunity
----------------	--

- Established a climate change sensitive or climate change integrated asset allocation strategy
- Targeted low carbon or climate resilient investments

	Specify the AUM invested in low carbon and climate resilient portfolios, funds, strategies or asset classes.
--	--

	trillions	billions	millions	thousands	hundreds
Total AUM			36	500	000
Currency	EUR				
Assets in USD			40	233	997

Specify the framework or taxonomy used.

AUM consists of CAPEX used for greenfield investments and Enterprise Value at the time of the acquisition for brownfield investments.

- Phase out your investments in your fossil fuel holdings
- Reduced portfolio exposure to emissions intensive or fossil fuel holdings
- Used emissions data or analysis to inform investment decision making
- Sought climate change integration by companies
- Sought climate supportive policy from governments
- Other, specify
- None of the above

SG 14.3

Indicate which of the following tools the organisation uses to manage climate-related risks and opportunities.

- Scenario analysis
- Disclosures on emissions risks to clients/trustees/management/beneficiaries
- Climate-related targets
- Encouraging internal and/or external portfolio managers to monitor emissions risks
- Emissions-risk monitoring and reporting are formalised into contracts when appointing managers
- Weighted average carbon intensity
- Carbon footprint (scope 1 and 2)
- Portfolio carbon footprint
- Total carbon emissions
- Carbon intensity
- Exposure to carbon-related assets
- Other emissions metrics
- Other, specify
- None of the above

SG 14 CC

Voluntary

General

**SG 14.6
CC**

Provide further details on the key metric(s) used to assess climate-related risks and opportunities.

Metric Type	Coverage	Purpose	Metric Unit	Metric Methodology
Climate-related targets	<input type="checkbox"/> All assets <input type="checkbox"/> Majority of assets <input type="checkbox"/> Minority of assets			

SG 14.7 CC Describe in further detail the key targets.

Targettype	Baseline year	Target year	Description	Attachments
<input type="checkbox"/> Absolute target <input type="checkbox"/> Intensity target				
<input type="checkbox"/> Absolute target <input type="checkbox"/> Intensity target				
<input type="checkbox"/> Absolute target <input type="checkbox"/> Intensity target				
<input type="checkbox"/> Absolute target <input type="checkbox"/> Intensity target				
<input type="checkbox"/> Absolute target <input type="checkbox"/> Intensity target				

SG 14.8 CC Indicate whether climate-related risks are integrated into overall risk management and explain the risk management processes used for identifying, assessing and managing climate-related risks.

Processes for climate-related risks are integrated into overall risk management

Please describe

An eligible investment should meet minimum thresholds for economic performance and financial profitability, the level and nature of which will vary from sector to sector and between technologies in different stages of development. In addition, the following tables list specific technical and economic criteria EIB eligible investments need to comply with. As there are various other factors which may determine the quality of an investment, these criteria should be taken as a necessary but not a sufficient condition.

In regard to the Economic Criteria, including for a threshold Levelised Cost of Electricity (LCOE), these should apply specifically for each operation.

Processes for climate-related risks are not integrated into overall risk management

SG 15	Mandatory to Report Voluntary to Disclose	Public	Descriptive	PRI 1
--------------	--	---------------	--------------------	--------------

SG 15.1 Indicate if your organisation allocates assets to, or manages, funds based on specific environmental and social themed areas.

Yes

SG 15.2

Indicate the percentage of your total AUM invested in environmental and social themed areas.

%

100

SG 15.3

Specify which thematic area(s) you invest in, indicate the percentage of your AUM in the particular asset class and provide a brief description.

Area

- Energy efficiency / Clean technology

Asset class invested

- Private equity
 Infrastructure

Percentage of AUM (+/-5%) per asset class invested in the area

4.3

Brief description and measures of investment

Thermo modernisation of two schools, social centre and sports hall in Mielno town in Poland under PPP agreement with municipality.

- Renewable energy

Asset class invested

- Private equity
 Infrastructure

Percentage of AUM (+/-5%) per asset class invested in the area

30

Brief description and measures of investment

- a) 48MW biomass heat-only boiler development in Vilnius, Lithuania;
 b) 4.9MW biogas plant portfolio in Latvia (Iecava, Daugavpils, Eleja);
 c) 18MW thermal and 3.98MW electricity combined heat and power plant in Salaspils, Riga region, Latvia.

- Green buildings
- Sustainable forestry
- Sustainable agriculture
- Microfinance
- SME financing
- Social enterprise / community investing
- Affordable housing
- Education

Asset class invested

- Private equity
- Infrastructure

Percentage of AUM (+/-5%) per asset class invested in the area

2.6

Brief description and measures of investment

7 431 sq. m. school developemnt in Vilnius, Lithuania

- Global health
- Water
- Other area, specify

No
