RI TRANSPARENCY REPORT

2018

Zadig

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2018 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Zadig Asset Management ("Zadig") is committed to maintaining an investment approach that incorporates environmental, social, and corporate governance ("ESG") in a comprehensive manner in order to safeguard the interests of our clients.

Zadig provides investment management services to institutional and individual investors around the world. Zadig, as a fiduciary to our clients, seeks, at all times, to act in our clients' best interests and treat each client fairly. This duty at Zadig has always been interpreted as the best financial interest of the client, and this principle underlies all aspects of Zadig's investment processes. We recognise that a company's ESG practices, whether good or bad, can affect its valuation and financial performance. As a result, we take ESG issues into consideration when making investment decisions. We utilise internal and external resources to assist us in analysing ESG issues, engage with companies in which we invest, and when authorised, normally vote proxies on all resolutions.

LEI 01.2	Describe your organisation's approach to incorporation and the reasons for choosing the particular ESG incorporation strategy/strategies.
-----------------	---

We are particularly sensitive to any issues in a business that may impact financial performance. In this regard, Zadig's investment professionals incorporate the governance of a company, its social behaviour, and its environmental impact in their fundamental analysis, as well as their view of the impact of these issues on the valuation of a company.

Zadig's analysts generally document the basis of their investment recommendations in a monthly report. This report typically covers a range of factors, and may include views on the potential impact of ESG issues, where relevant, along with views on the drivers of company returns. While a Portfolio Manager/Analyst is never prohibited from purchasing or holding a position due to an ESG issue, consideration of these issues is made part of the investment decision.
