RI TRANSPARENCY REPORT

2019

LVM Landwirtschaftlicher Versicherungsverein Münster a.G.

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

The incorporation of ESG issues forms an integral part of our investment analysis and decision-making process. Existing as well as potential new external asset managers are provided with a comprehensive questionnaire about their sustainability approach. Questions raised during this process centre on whether the PRIs have been signed, what PRI-Score was achieved, how ESG issues are integrated into the asset management process, and how active ownership is executed.

For our external listed equity and corporate mandates, key sustainability indicators (e.g. carbon footprint, energy consumption, water use) are calculated on a yearly basis and are compared to the respective benchmark. Furthermore, a thorough analysis of sustainable portfolio characteristics is being elaborated.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

The principle of insurance is historically the idea of solidarity, where a community provides support and security for one another. Especially in the legal form of a mutual insurance company central importance is still attached to this basic idea nowadays. That is just how LVM Versicherung sees itself committed to the interests of the customers and beneficiaries. Our business as well as investment policy focuses on this fiduciary duty instead of shareholders' short term profit interests. The sustainability of yields is of particular importance as it provides long-term security for the beneficiaries. Besides the usual criteria safety, profitability and liquidity we explicitly incorporate the criterion of sustainability into our investment decisions.

SG 03.1

Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

 Yes**SG 03.2**

Describe your policy on managing potential conflicts of interest in the investment process.

Investment decisions have to be made in the best interest of the policyholders and beneficiaries or pension recipients. This primary objective includes a set of different sub-goals - for example, the highest possible return, the highest possible degree of security and long-term stability for the company - some of which are in conflict with one another. Furthermore, policyholders and beneficiaries are not a homogeneous group whose interests are the same. The ensuing conflicts of interest are to be resolved at a higher level - it is not the particular interests of individual groups that are protected, but the interests of the policyholders and beneficiaries as a whole. This is done in particular by an investment policy geared to the respective investment objectives, the formation of collateral assets at the individual insurance companies of the LVM Group and the securing of the assets of the collateral by the trustee. In the event of a conflict of interest, for example in connection with intra-group transactions, it must be ensured that the interests of policyholders and beneficiaries are given priority.

SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

The managing board (which includes CEO and CIO) decides about the RI strategy. They are informed about sustainability issues and proposed changes in the sustainable investment approach on a regular basis by the head of portfolio management and the investment committee. The sustainable investment approach is developed, evaluated and continuously enhanced by portfolio management together with the head of portfolio management. Internal and external asset managers are provided with an exclusion list they have to comply with on a biannual basis. The KVG has the duty to monitor the compliance and to prevent any violation of the guidelines by the asset managers.

FI 04.2 Describe your approach to screening for internally managed active fixed income

Because of limited internal resources to cover all aspects on our own, we decided to use an external ESG-rating agency. In a due diligence process we picked Sustainalytics as our partner.

We defined three pillars of our exclusionary screening: We want companies we invest in to be (1) compliant to the ten principles of the UN Global Compact, (2) not to produce or sell controversial weapons and (3) not to promote, use or sell thermal coal in a substantial way.

If a company does not fit our requirements, it is not allowed to be invested in.
