RI TRANSPARENCY REPORT

2020

KBC Asset Management NV

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SUSTAINABLE INVESTMENTS**Socially responsible investment**

(SRI) has developed in recent years from a niche market to a mainstream segment. KBC has been a pioneer in the field of sustainable investment for almost 30 years. We view it as another powerful tool with which to help achieve a more sustainable society. We want to give our clients the opportunity to invest in sustainable companies and countries that recognise their social and environmental responsibility. This allows us to jointly contribute to a more sustainable society and to help limit the adverse impact businesses can have on society. In 2019, we were able to increase the volume of SRI funds to 12 billion euros, putting us firmly on track to achieve our 2021 target.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Businesses whose activities or the way they pursue those activities are seriously at odds with the principles of sustainability are automatically excluded. We operate exclusion criteria that apply to all KBC funds as well as ones specifically for the SRI funds.

Each sustainable universe at Asset Management is subject to positive as well as negative screening. What this means is that we examine which companies and governments are fully committed to sustainability or whose products and services have a positive impact on the environment and society. We apply three types of positive screening: Best-in-Class (BiC), Theme and Impact Investing. Once sustainable universes have been finalised, the managers of the portfolios can select shares and corporate and government bonds.

THREE TYPES OF SUSTAINABLE FUNDS

- Best-in-class funds invest in companies from a broad range of sectors, that are the best performers in terms of sound corporate governance, social policy and environmental approach. By working only with the best 40% of businesses, and as few as 20% in the mining sector, companies are challenged to operate more sustainably. The funds also include bonds from the most sustainable countries. Criteria for this include the welfare of the population, care of the environment and international relations.
- Theme funds invest in companies that make a sustainable contribution to solving a societal problem like climate change, the threat of water shortages and the quest for alternative energy.
- Impact Investing funds comprise 50 innovative businesses that are completely rethinking themes like mobility, energy, health and population ageing, and formulating surprising solutions to them. These are often slightly smaller (listed) players, but they have still come through KBC Asset Management's stringent screening.

TRANSPARENCY

We review our sustainability criteria on an ongoing basis. KBC Asset Management places a great deal of emphasis on transparency, which is why it makes all its research results and the full list of exclusions available on www.kbc.be.

INDEPENDENCE

Sustainable and responsible investing stands or falls by its credibility. The sustainability policy and criteria are therefore monitored by the SRI Advisory Board, which is fully independent of KBC. The body consists of leading academics from several universities, who are experts in fields like human rights, business ethics, biology and ecology. They operate in their own name and do not represent the institutions at which they are employed. They decide which screening methodology we should use and set the criteria for rating companies. They also ensure that screening is complete, thorough and accurate.

PROXY VOTING

KBC Asset Management pursues an active policy of proxy voting and engagement. By exercising the rights attached to shares held by the investment funds and by making our voice heard at the annual general meetings of these companies, KBC aims to defend the interests of our clients and investors. We do so by proxy voting, when deemed appropriate and necessary. KBC Asset Management applies this active voting policy to several different themes, recognising that business, corporate governance and sustainability issues all determine the value of a company in the medium and long term. All these factors can have a significant impact on value creation or the return enjoyed by clients and investors.

LEI 01.2

Describe your organisation's approach to ESG incorporation and the reasons for choosing the particular strategy/strategies.

For all our funds we apply both exclusions and norms based screening.

We offer 3 strategies within sustainable investments: Themed funds, Best-in-class funds and Impact Investing.

(A) Implementation: Screening

LEI 04	Mandatory	Public	Descriptive	PRI 1
--------	-----------	--------	-------------	-------

LEI 04.1

Indicate and describe the type of screening you apply to your internally managed active listed equities.

Type of screening

- Negative/exclusionary screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

For all funds we use exclusion (of controversial weapons, tobacco, agro crops and livestock) and norms based screening (exclusion of UN Global Compact worst offenders)

For our sustainable funds we exclude moreover all weapons, fossil fuels, gambling, fur and speciality leather, adult entertainment, activities in countries having controversial regimes and we apply stricter criteria on violating the UN GC principles.

- Positive/best-in-class screening

Screened by

- Product
- Activity
- Sector
- Country/geographic region
- Environmental and social practices and performance
- Corporate governance

Description

BIC company screening (best 40% based on >100 indicators) and BIC countries screening (best 50% based on 15 indicators of Developed markets, best 25% based on 14 indicators of Emerging markets).

- Norms-based screening

Screened by

- UN Global Compact Principles
- The UN Guiding Principles on Business and Human Rights
- International Labour Organization Conventions
- United Nations Convention Against Corruption
- OECD Guidelines for Multinational Enterprises
- Other, specify

Exclusion list of Norwegian Government Pension Fund

Description

For all our funds worst offenders of the UN GC principles are excluded. For SRI funds, all companies with any controversy 4 or 5 (scale 0-5, 5 is worst, database Sustainalytics) are excluded + non-compliant companies according to Sustainalytics+exclusions of NPF.

LEI 04.2	Describe how you notify clients and/or beneficiaries when changes are made to your screening criteria.
----------	--

Screening criteria are established in consultation with our independent SRI Advisory Board. The criteria can be reviewed every quarter, as the Board comes together. The universes are completely updated once a year, with an interim update of UN Global Compact and Blacklist Controversial Weapons every 6 months and ad hoc updates if necessary (new criteria or ad hoc exclusions). Our methodology is published on our website.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

For all our corporate funds we apply both exclusions and norms based screening. For all our SSA funds we apply exclusions.

We offer a best-in-class strategy within sustainable investments, both for government bonds (best 50% based on 15 indicators for developed markets, best 25% based on 14 indicators for emerging markets) and corporates (best 40% based on >100 indicators).

FI 03	Mandatory	Public	Additional Assessed	PRI 1
-------	-----------	--------	---------------------	-------

FI 03.1 Indicate how you ensure that your ESG research process is robust:

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

FI 03.2 Describe how your ESG information or analysis is shared among your investment team.

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, 'tear sheets', or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions
- Other, specify
Investment staff is informed by every ESG update (frequency: +/- monthly)
