# RI TRANSPARENCY REPORT

## 2019

Tribe Impact Capital LLP

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

This includes the key tenets of the Paris Climate Accord.

The SDGs form the basis of all of the due diligence we do on product in the marketplace. We have developed our AMI process to enable us to do this <https://www.tribeimpactcapital.com/our-services/>

We have a dual approach to investments decisions within Tribe supported by an Investment Committee and an Impact Committee. Both must be in agreement before any 'product' is approved in our universe and both have the right of veto over the other. This approach manages internal conflicts, non client specific.

Additionally, given what we do (impact wealth management using the UNSDGs) and how we promote/explain that we don't often have conflicts arising from an impact point of view (what we do is wonderfully self selecting when it comes to clients). However, on a case by case basis when clients may want to bring assets over in specie that may conflict with our mission to be impact wealth managers we will engage with the client to understand why that asset is being held, assess appetite and opportunities for divestment and then decide whether to take that asset under Tribe management. The same principle applies for investment (financial) decisions.
