RI TRANSPARENCY REPORT

2018

AB Max Sievert

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2018 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

----------------	--

AB Max Sievert ("ABMS") invests long-term in profitable Swedish and Nordic companies. We want to be an active sole or part owner of a handful of companies that strive to be best in class and contribute to their long-term development.

In our view, sustainability, long term corporate development and investment returns go hand-in-hand. Sustainable returns and value creation can only be achieved in tune with society as a whole. We recognize that environmental, social and governance ("ESG") matters will have an impact on the development of our portfolio companies and the communities in which they operate. ABMS aims to create shareholder value in an ethical and responsible way.

As an active owner, ABMS has many possible ways of affecting ESG matters, for example through due diligence processes, business plan development, board representation, and by increasing awareness in our formal and informal contacts with others. As an important part of ABMS' strategy, we have developed an ESG Policy as presented below, including a framework for our view on responsible investments and how our policy is implemented.
