RI TRANSPARENCY REPORT

2018

ClariVest Asset Management LLC

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2018 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

----------------	--

ClariVest's commitment to Responsible Investment begins with our investment process, and identifying companies with Environmental, Social and Governance (ESG) issues that we believe have the potential to negatively impact expectations around the company in keeping with our typical expectations horizon (i.e., 6 to 24 months). We identify these companies by obtaining ratings information for a universe of 10,000 stocks with respect to (1) Norms-Based Analysis and (2) Controversial Weapons Analysis.

The Norms-Based Analysis focuses on a company's adherence to global norms on environmental protection, human rights, labor standards and anti-corruption. The Controversial Weapons Analysis focuses on companies that are involved in the production of weapons banned under international legal instruments, or those that are particularly controversial due to their indiscriminate effects and the disproportionate harm they cause.

The ratings information described above is pushed to Portfolio Managers (PM) at each stage of the investment process, including initial idea screening, investment thesis development, at time of trade and during ongoing portfolio monitoring. We task our investment professionals with making the inherently subjective decision as to whether to invest in a company for which an ESG issue exists.

LEI 01.2

Describe your organisation's approach to incorporation and the reasons for choosing the particular ESG incorporation strategy/strategies.

ClariVest's commitment to Responsible Investment begins with our investment process, and identifying companies with Environmental, Social and Governance (ESG) issues that we believe have the potential to negatively impact expectations around the company in keeping with our typical expectations horizon (i.e., 6 to 24 months). We identify these companies by obtaining ratings information for a universe of 10,000 stocks with respect to (1) Norms-Based Analysis and (2) Controversial Weapons Analysis.

The Norms-Based Analysis focuses on a company's adherence to global norms on environmental protection, human rights, labor standards and anti-corruption. The Controversial Weapons Analysis focuses on companies that are involved in the production of weapons banned under international legal instruments, or those that are particularly controversial due to their indiscriminate effects and the disproportionate harm they cause.

The ratings information described above is pushed to Portfolio Managers (PM) at each stage of the investment process, including initial idea screening, investment thesis development, at time of trade and during ongoing portfolio monitoring. We task our investment professionals with making the inherently subjective decision as to whether to invest in a company for which an ESG issue exists. The PM must evaluate the decision from a number of different aspects involving both risk and reward. From a reward aspect, the PM centers his evaluation on the potential impact of the ESG related issue on near to mid-term expectations about the future of the firm being evaluated. From a risk perspective, the PM must consider the risk to the stock-specific investment case, as well as to the systematic risk ramifications of investing (or not investing) in the stock.

With respect to certain accounts, we also apply Screening at the request of the client.

Our engagement policy describes our use of a service provider to engage within a large pool of like-minded investors.

None of the above

LEA 01.4	Provide a brief overview of your organization's approach to engagement
-----------------	--

A key component of our responsible investment policy is our engagement approach. Engagement allows the investor to play an active role with regard to ESG related issues, while fulfilling its fiduciary duty. We engage, together with other like-minded investors, with companies identified through the research and rating process described above. This engagement process is accomplished through the support of the same third party provider, who facilitates the dialogue between the investor pool and the target company with what we believe is the right level of objectivity, due-process, and diligence to maximize the power of the engagement process. Further, we believe that engagement within a large pool of like-minded investors can wield significantly more influence than we might be able to achieve alone. In our eyes, the ultimate goal of this process is to move companies from a place where expectations may be dominated by ESG related issues towards a place where they are more in line with the natural cycle of fundamentals that they and other market participants move through within competitive markets.

LEA 16.1 Indicate how you typically make your (proxy) voting decisions.

Approach

- We use our own research or voting team and make voting decisions without the use of service providers.
- We hire service provider(s) that make voting recommendations or provide research that we use to inform our voting decisions.

Based on

- the service provider voting policy signed off by us
- our own voting policy
- our clients' requests or policy
- other, explain
- We hire service provider(s) that make voting decisions on our behalf, except for some pre-defined scenarios for which we review and make voting decisions.
- We hire service provider(s) that make voting decisions on our behalf.

LEA 16.2 Provide an overview of how you ensure your voting policy is adhered to, giving details of your approach when exceptions to the policy are made (if applicable).

As a default, proxies are generally voted by ISS in accordance with ISS recommendations. However, ClariVest retains ultimate decision making authority with respect to the voting of Client proxies and reserves the right to override ISS recommendations.

ClariVest's investment personnel shall be responsible for making voting decisions with respect to all Client proxies, where a proxy is not voted in accordance with ISS recommendations. Such decisions shall then be provided to the Operations Manager who will then ensure that such proxy votes are submitted in a timely manner.
