RI TRANSPARENCY REPORT

2020

Niederösterreichische Vorsorgekasse AG

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

In Austria employees and self-employed persons are obliged to participate in the system of company pension funds for employees and self-employed persons (betriebliche Mitarbeiter- und Selbständigenvorsorge). All employees, whose employment contract started on 1 January 2003 or later as well as self-employed persons (since 1 January 2008) receive contributions in the system.

It is guaranteed by law that everybody receives the entire amount paid in (capital guarantee) as soon as a claim option exists.

The contributions to the company pension fund are held on trust by Niederösterreichische Vorsorgekasse AG. Our main task is to invest the pension contributions in a secure und profitable way. This means an important responsibility. Therefore, Niederösterreichische Vorsorgekasse AG acts upon economic, ecological and social principles.

OO 11.4 Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

We rely on a detailed sustainability concept which builds the framework for our investment decisions. We have defined exclusion criteria as well as positive criteria for our investment process. The sustainability concept is used for the whole portfolio.

We invest in two special funds managed by our asset manager. Our asset manager incorporates our defined criteria in the selection process. Therefore the asset manager cooperates with an independent sustainability-research agency.

Listed equity & fixed income: New investments are possible, when no exclusion criteria is hurt and when the company or country has a high sustainability rating from the research agency.

Property: New investments in property fund have to meet our positive criteria, otherwise an investment isn't possible.

So, we incorporate ESG already into our selection process. In the case of existing non-sustainable investments, we incorporate ESG into our monitoring process by addressing ESG to the management.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Niederösterreichische Vorsorgekasse AG acts upon economic, ecological and social principles. We rely on a detailed sustainability concept which build the framework for our investment decisions. We have defined exclusion criteria as well as positive criteria for our investment process. The sustainability concept is used for the whole portfolio. We stand for good performance with sustainable investments. We are convinced that the incorporation of sustainable aspects minimizes the risks and bring long-term returns. Our target is a completely sustainable portfolio as defined by our sustainability concept. Since 2016 this target has been reached.

We have also founded a sustainability committee with 10 experts, which gives us support in sustainability matters.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Key elements are our defined exclusion criteria as well as positive criteria. Based on the list of criteria we ensure a fundamental sustainability performance. We do not invest in companies that act in defined industries. The list includes for example: nuclear power, violation of human rights, violation of employment law, pornography, violation of environmental law, coal and coal production, oil sands, fracking.

Furthermore, we have exclusion criteria for countries as well for example violation of human rights, child labour, death penalty, money laundering, violation of democracy, climate protection.

Our target are investments in companies and states that meet the list of positive criteria.

In both cases we work together with an independant, external rating agency.

SG 05.2

Additional information. [Optional]

In 2016 we set objectives for increasing investments in sustainable companies and countries. Therefore we use the services from our sustainability rating agency (ISS-oekom). ISS-oekom provides very accurate sustainability assessments und ratings. The pioneers in each industry get the best rating "oekom prime". Via our asset manager, we have access to the data. So we defined a quote of oekom prime and oekom prime-1 to reach in 2017 (=70%) and 2018 (=80%) for the fixed-income part of the portfolio to improve our portfolio. For 2019 and the following years the objective is to hold the 80%.

This objectives were reviewed quarterly and could be reached in all 3 years.

FI 01.2 Describe your reasons for choosing a particular ESG incorporation strategy and how combinations of strategies are used.

In cooperation with our external ESG-research provider, ISS ESG, we have set up an in-depth ESG-Screening based on a combination of positive criteria and a comprehensive list of exclusion criteria.

For companies, the exclusion-screening is carried out for controversial business areas (military, nuclear power, alcohol, gambling, tobacco, pornography, GMO, coal mining, hydraulic fracturing as well as the mining of oil sands) as well as for controversial business practices (Human Rights Controversies, Labour Rights Controversies, Controversial Environmental Practices).

For countries, the exclusion-screening is done for Authoritarian Regime, Child Labour, Death Penalty, Freedom of Association, Military Budget, Money Laundering, Possession of Nuclear Weapons, Violation of Human Rights and Resistance against International Conventions on Climate Protection.

The positive ESG-Screening is done by evaluating those companies and countries with a 'prime' assessment by ISS ESG. The assessment of the social and environmental performance of a company or country as part of the Corporate/Country Rating is carried out with the aid of over 100 social and environmental criteria, selected specifically for each industry, covering six areas.

FI 03.1 Indicate how you ensure that your ESG research process is robust:

- Comprehensive ESG research is undertaken internally to determine companies' activities; and products and/or services
- Issuers are given the opportunity by you or your research provider to review ESG research on them and correct inaccuracies
- Issuer information and/or ESG ratings are updated regularly to ensure ESG research is accurate
- Internal audits and regular reviews of ESG research are undertaken in a systematic way.
- A materiality/sustainability framework is created and regularly updated that includes all the key ESG risks and opportunities for each sector/country.
- Other, specify
- None of the above

FI 03.2 Describe how your ESG information or analysis is shared among your investment team.

- ESG information is held within a centralised database and is accessible to all investment staff
- ESG information is displayed on front office research platforms
- ESG information is a standard item on all individual issuer summaries, research notes, 'tear sheets', or similar documents
- Investment staff are required to discuss ESG information on issuers as a standard item during investment committee meetings
- Records capture how ESG information and research was incorporated into investment decisions
- Other, specify
- None of the above
