

RI TRANSPARENCY REPORT

2020

VinaCapital Investment Management Ltd

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

At VinaCapital, we incorporate ESG issues into investment analysis and decision-making processes. Our portfolio managers are also active in analysing the potential effects of ESG issues when making investment decisions. This approach is also a key to develop our understanding of the portfolio company.

We are active owners and incorporate ESG issues into our ownership policies and practices. With our voting rights and our influence as an investor, we often play an important role in improving the governance of the companies in which we invest. We engage directly with companies on ESG issues and encourage good governance and sustainable corporate practices.

We seek appropriate disclosure about ESG issues from the entities in which we invest. We encourage transparency in our discussions around ESG performance with portfolio companies and support the adoption of/adherence to relevant norms, standards, codes of conduct or international initiatives.

SG 03.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

Yes

SG 03.2

Describe your policy on managing potential conflicts of interest in the investment process.

VinaCapital has policies and procedures in place to identify and manage potential conflicts of interest that may arise in the course of providing services to its Funds and managed accounts.

VinaCapital has identified specific potential conflicts of interest which may arise in relation to its activities. The general nature and/or source of these conflicts will be disclosed to clients before undertaking business in sufficient detail to enable the client to make an informed decision about the service in the context in which the conflict has arisen. For each potential situation, VinaCapital has analysed whether or not the risk is actual or potential for one or more of its clients.

It is not always possible to prevent actual conflicts of interest from arising. In that case VinaCapital will try to manage the conflicts of interests by:

- (i) disclosure to the client;
- (ii) establishing an information barrier (Chinese wall); or
- (iii) declining to provide the service.
