RI TRANSPARENCY REPORT

2020

Stichting Pensioenfonds UWV

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.4

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

One of the search criteria for external managers is to be a UN PRI signatory. Furthermore, the factor 'ESG' is an explicit selection criterium during each search process.

Every quarter a manager monitoring takes place, during which the factor 'ESG' is explicitly taken into account. The fund publishes an annual ESG report. In both reports it is evaluated by our fiduciary manager whether the external managers have successfully implemented the ESG policy of the fund, which is summarized directly below.

The fund applies an exclusion list of companies (no controversial weapons, no tobacco, no coal mines, no human rights violations including violation of good labour conditions), participates in the (collective) engagement of our fiduciary manager and applies voting to its entire equity portfolio (implemented by equity managers both based on voting policy of the equity manager itself). The fund invests in green bonds. The funds invests in a commodities ex agricultural products commodity index, in order to avoid price speculation of food stuffs.

The fund has adopted a best-in-class approach in its equity, EMD and credit portfolios by means of ESG ratings which are translated to ESG benchmarks. These ESG benchmarks have been implemented in the EMD portfolio and will be implemented in the equity and credit portfolios in 2020 Q2. The fund has set out concrete ESG targets with respect to all property investments; all property funds should have at least 4 GRESB stars and a green star awards. Furthermore, the funds invests in renewable energy via its infrastructure investments. A discussion is

underway to exclude all fossil investments in this specific investment category. A carbon reduction target is also discussed, but not yet decided upon. The carbon footprint is measured on an annual basis. As a consequence of the adoption of the ESG benchmarks the carbon footprint will decrease by 15% in the developed equity portfolio, the credit portfolio and EMD portfolio and by 40% in the emerging market equity portfolio. During all current search processes aforementioned aspects are already taken into account.

OO 11.5

For your externally managed pooled funds, describe any mechanisms in place to set expectations as part of the appointment or commitment process.

The fund only invested in money market pooled funds, mortgage pooled funds, non-listed property funds, non-listed private equity funds and non-listed infrastructure funds. Only in case of money market funds and mortgage funds no attention is given to ESG aspects during the selection and appointment of managers. This may change for mortgage fund providers if ESG-mortgage funds become available.

In case of non-listed property funds ESG aspects are explicitly taken into account by assessing the number of GRESB stars and whether or not the fund has a Green Star. In case of private equity funds and infrastructure funds, ESG aspects are discussed between our fiduciary manager and our Private Markets manager. The latter also provides an annual ESG report. In case of doubt, the Private Markets will reach out to the fund directly to check whether it can proceed with a certain investment proposal.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

The fund has nine general investment principles . One of these principles is dedicated to ESG.

The pension fund invests in order to meet future pension payment liabilities. The investment portfolio is invested in a diversified way to mitigate risk and maximise returns. It is believed that ESG does not reduce investment returns and may reduce financial risks resulting from physical damage of transitioning to a fossil-free world.

The ESG policy of the fund has been extensively discussed with stakeholders before deciding on the final set-up of the policy; the policy has a 3 year term in which ambitions should be realized.

ESG considerations are integrally taken into account in the investment policy, both in determining the asset mix and on an individual level. ESG is implemented through a combination of exclusions (100% coverage), best-in-class (equities, credits and emerging market debt), voting (equities) and engagement activities (equities). Active (impact-like) strategies are considered in the private markets portfolio (most notably infrastructure).

The implementation of the ESG policy and its results are disclosed in the annual ESG report of the fund. A dedicated ESG report is also required from our property advisor and manager of private market investments.

SG 01.6 CC

Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Yes

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

In its annual carbon footprint report an assessment is made of physical and transitional risks within the investment portfolio. Currently, a discussion is ongoing to act on the insights of these reports by i.e. excluding certain sectors and/or regions from investing in. The first example has already been the exclusion of coal mines, due to the expected negative transitional impact. The fund is contemplating an assessment of its real estate portfolio and infrastructure portfolio in order to gauge potential physical risks.

No

**SG 01.7
CC**

Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

No

Describe why your organisation has not yet assessed the likelihood and impact of climate risks

Quantification of climate risks has not yet been conducted, but is planned to be undertaken in the course of 2020 as part of its Own Risk Assessments as prescribed by the IORPII directive

**SG 01.8
CC**

Indicate whether the organisation publicly supports the TCFD?

Yes

No

Explain the rationale

The fund does not publicly endorse TCFD. However, in the fund's ESG policy a reference is made to TCFD guidelines as a tool to enhance access to climate risk related data.. Indirectly, the fund uses TCFD guidelines when applying ESG scores (in case of the Environmental score).

**SG 01.9
CC**

Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

Yes

Describe

By means of a carbon reduction target the fund attempts to mitigate this risk. Furthermore, by means of a best-in-class approach the fund wishes to exclude the 50% worst performing companies from the investment portfolio. To this end ESG ratings are applied to companies. This will mitigate potential financial risks to climate change.

No

**SG 1.10

SG 03	Mandatory	Public	Core Assessed	General
-------	-----------	--------	---------------	---------

SG 03.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

- Yes

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

All managers should have a conflicts of interest policy. Especially in case of private markets investments this is heavily scrutinized, also in the legal documentation between the pension fund and the private markets manager. In case of mortgage pooled funds, the pension fund explicitly requires a vertical slice to be retained by the manager ('skin in the game').

Furthermore, the pension fund has the policy that it will not purchase any investment products (i.e funds an/or mandates) of its fiduciary manager.

No

Objectives and strategies

SG 05	Mandatory	Public	Gateway/Core Assessed	General
-------	-----------	--------	-----------------------	---------

SG 05.1 Indicate if and how frequently your organisation sets and reviews objectives for its responsible investment activities.

- Quarterly or more frequently
- Biannually
- Annually
- Less frequently than annually
- Ad-hoc basis
- It is not set/reviewed

SG 05.2 Additional information. [Optional]

- The pension fund seeks to avoid reputational and financial risk by pursuing a policy, comprising the exclusion of companies both by a rather static exclusion list (updated at least once a year) and in the future also more dynamically by means of a best-in-class policy (updated at every benchmark update). The policy itself is reviewed every 3 years. Due to the broad nature of the policy, a road map has been made outlining when actions are to be realized in certain fields. As a result, the policy itself will change every year once the road map progresses.

- The pension fund seeks to improve the ESG performance of companies in which it invests by pursuing an active policy approach (engagement) and by voting at annual meetings (proxy voting).

 - No oversight/accountability or implementation responsibility for responsible investment

SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

Fiduciary manager is responsible for the oversight for responsible investment by means of ESG-monitoring and ESG-reporting. The pension fund remains accountable for the outcome of the policy.

The implementation of the ESG-policy is mostly done by the external managers and in some instances (i.e. engagement) also by the fiduciary manager.

SG 07.3

Indicate the number of dedicated responsible investment staff your organisation has.

Number

0.5

SG 07.4	Additional information. [Optional]
----------------	------------------------------------

At Pensioenfond UWV there is no dedicated responsible investment staff. However, the 2 investments professional working for the pension fund spend approximately 25% of their time on ESG policy preparation and judging ESG reporting. At the fiduciary manager and external managers combined there are multiple persons (estimation of at least 10) dedicated to the implementation of the policy.

 - No responsibility for climate-related issues

SG 07.6 CC	For board-level roles that have climate-related issue oversight/accountability or implementation responsibilities, indicate how these responsibilities are executed.
-------------------	--

The board has set ESG-goals of which some are directly tied to climate action. The board is ultimately responsible whether these goals are implemented. To this end it oversees, with the help of the Pension Bureau, whether external managers and service providers (ie. fiduciary manager) implement the ESG policy and whether these parties report in a sufficient fashion about the implementation outcomes.

The fiduciary manager assesses/monitors the implementation efforts of the external managers. In this respect, the CO2 intensity of the investment portfolio is compiled on an annual basis. Furthermore, the fiduciary manager tracks the degree of CO2 emission reduction by comparing the CO2 intensity of the ESG benchmarks versus a regular (non-ESG) benchmark.

SG 14.4

If you selected disclosure on emissions risks, list any specific climate related disclosure tools or frameworks that you used.

The pension fund has conducted an initial carbon intensity measurement of its investment portfolio in 2018 and 2019. The 2019 determined the starting point to evaluate future performance in terms of reduction of carbon emissions. A new one will be conducted in 2020 Q2 in order to check outcomes. If carbon data becomes more widely available a formal carbon reduction target will be determined.

Coal mines will be excluded as the Carbon intensity is too high of these investments. The exclusion of coal-fired utilities is under investigation.
