

CLIMATE TRANSPARENCY REPORT 2020

BDL Capital Management

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-D53932FA-8CF8-4256-85E8-50AB9F9B4BBC/79894dbc337a40828d895f9402aa63de/html/2/?!lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

TCFD Recommendations Index

Investment policy

SG 01	Mandatory	Public	Core Assessed	General
-------	-----------	--------	---------------	---------

New selection options have been added to this indicator. Please review your prefilled responses carefully.

SG 01.1 Indicate if you have an investment policy that covers your responsible investment approach.

SG 01 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
----------	---	--------	-------------	---------

SG 01.6 CC Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Yes

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

To select companies, we analyse several ESG criteria, especially governance and measures to combat climate change.

At BDL Capital Management, we think that creating a carbon-free economy is the biggest industrial, technological and social challenge of the next 30 years.

We are rising to this challenge by encouraging the companies in which we hold shares to pursue an ambitious climate policy and become leaders of this new industrial revolution.

To contribute to the emergence of a carbon neutral world, we send letters to corporate management making clear our expectations as long-term shareholders.

We want companies to :

- complete the CDP questionnaire on their climate strategy, and make it public
- undertake to publish scientifically validated greenhouse gas reduction targets
- work to obtain "leader" status and an A rating from CDP

No

SG 01.7 CC Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

Describe the associated timescales linked to these risks and opportunities.

These three goals are concrete and measurable. If all companies complete them it would ensure great transparency, speedier initiatives and a decarbonisation of the economy in line with the objectives of the Paris Agreement.

No

**SG 01.8
CC**

Indicate whether the organisation publicly supports the TCFD?

- Yes
- No

Explain the rationale

We have a constructive partnership with CDP since 2019

**SG 01.9
CC**

Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

- Yes
- No

Describe how and over what time frame the organisation will implement an organisation-wide strategy that manages climate-related risks and opportunities.

2019 is the first year where climate-related risks and opportunities are integrated. We have to experiment our methodology before set up a time frame

**SG 1.10
CC**

Indicate the documents and/or communications the organisation uses to publish TCFD disclosures.

- Public PRI Climate Transparency Report
- Annual financial filings
- Regular client reporting
- Member communications
- Other
- We currently do not publish TCFD disclosures

Governance and human resources

ESG issues in asset allocation

SG 13

Mandatory

Public

Descriptive

PRI 1

SG 13.1

Indicate whether the organisation carries out scenario analysis and/or modelling, and if it does, provide a description of the scenario analysis (by asset class, sector, strategic asset allocation, etc.).

- Yes, in order to assess future ESG factors
- Yes, in order to assess future climate-related risks and opportunities
- No, our organisation does not currently carry out scenario analysis and/or modelling
