CLIMATE TRANSPARENCY REPORT

2019

ASR Nederland N.V.

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2019 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2019 Reporting Framework response. The full Public Transparency Report is available here (https://reporting.unpri.org/surveys/PRI-reporting-framework-2019/-B44372CC-A739-4632-9519-56B849F0D226/00000000-0000-0000-0000-000000000000/doc/2/-%7C%7C*complete*%7C*public*/Merged/). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2019 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

Investment policy

SG 01

Mandatory

Public

Core Assessed

General

New selection options have been added to this indicator. Please review your prefilled responses carefully.

SG 01.1

Indicate if you have an investment policy that covers your responsible investment approach.

Yes

SG 01.2

Indicate the components/types and coverage of your policy.

Select all that apply

Policy components/types	Coverage by AUM
<input checked="" type="checkbox"/> Policy setting out your overall approach <input checked="" type="checkbox"/> Formalised guidelines on environmental factors <input checked="" type="checkbox"/> Formalised guidelines on social factors <input checked="" type="checkbox"/> Formalised guidelines on corporate governance factors <input type="checkbox"/> Fiduciary (or equivalent) duties <input checked="" type="checkbox"/> Asset class-specific RI guidelines <input checked="" type="checkbox"/> Sector specific RI guidelines <input checked="" type="checkbox"/> Screening / exclusions policy <input checked="" type="checkbox"/> Engagement policy <input checked="" type="checkbox"/> (Proxy) voting policy <input type="checkbox"/> Other, specify (1) <input type="checkbox"/> Other, specify(2)	<input checked="" type="radio"/> Applicable policies cover all AUM <input type="radio"/> Applicable policies cover a majority of AUM <input type="radio"/> Applicable policies cover a minority of AUM

SG 01.3

Indicate if the investment policy covers any of the following

- Your organisation's definition of ESG and/or responsible investment and it's relation to investments
- Your investment objectives that take ESG factors/real economy influence into account
- Time horizon of your investment
- Governance structure of organisational ESG responsibilities
- ESG incorporation approaches
- Active ownership approaches
- Reporting
- Climate change
- Understanding and incorporating client / beneficiary sustainability preferences
- Other RI considerations, specify (1)
- Other RI considerations, specify (2)

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

The investment principles and investment strategy are captured in a number of documents publicly available at ASR corporate website, including our overarching SRI policy with specific ESG factors and a detailed document on the detailed criteria and international guidelines used. For environmental criteria we have specific research studies publicly available. ASR SRI policy is applied to 100% of ASR investments.

Please refer to <https://www.asrnederland.nl/over-asr/duurzaam-ondernemen>

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

a.s.r. SRI Policy

Any investments where a.s.r. has the power to exercise influence on the investment portfolio or guidelines are governed by the SRI Policy for Companies and the SRI Policy for Countries.

a.s.r. SRI Policy for Companies

Investment decisions include the company's score on ESG criteria and an assessment of controversial activities. This is how a.s.r. avoids non-financial risk, especially reputational risk, and complies with legislation, i.e. the UN PRI, UN Global Compact and the Dutch Association of Insurer's Sustainable Investing Code. a.s.r. SRI guidelines follow the standards as defined by Forum Ethibel and SRI research is performed by Vigeo Eiris. The SRI Policy for Companies is implemented as follows:

1. Selection of companies by their relative ESG score

We favour companies excelling on ESG policy and implementation; these are classified as pioneering, best-in-class and sustainable companies. This classification starts from a relative, sector-wise ranking for six domains of analysis:

- Environment
- Human Resources
- Human Rights
- Community Involvement
- Business Behaviour
- Corporate Governance

Additionally, a.s.r. has defined specific guidelines for the relative ranking of companies involved in the following activities:

- Animal welfare violations
- Sex industry
- GMOs in food and feeds
- Hazardous chemicals
- Alcohol

2. Controversial activities that can start an engagement process or lead to exclusion

As an institutional investor, a.s.r. can influence companies through engagement rather than by excluding them from its investment portfolio. When a.s.r. does not achieve adequate improvement in a constructive dialogue, it can exclude a company from its investment portfolio. The engagement and exclusion process looks at the following controversial activities:

- Human rights
- Labour Rights
- Environment
- Armament
- Nuclear Energy
- Gambling
- Tobacco

a.s.r. SRI Policy for Countries

1. Exclusion of countries considered lacking basic political freedoms and civil rights. Indicator: 'Freedom in the World' published by Freedom House. Countries are classified as 'Free', 'Partly Free' and 'Not Free'. Exclusion level: countries classified as 'Not Free' by Freedom House.

2. Exclusion of countries considered highly corrupt. Indicator: Corruption Perception Index published by Transparency International. The Corruption Perception Index (CPI) by Transparency International (TI) ranks countries from 100 (very little corruption) to 0 (very high level of corruption). Exclusion level: countries with a CPI of less than 30.

3. Exclusion of countries with poor environmental performance to achieve the climate agreement and the SDGs. Indicator: SDG Index, published by the Sustainable Development Solutions Network (SDSN) and the Bertelsmann Stiftung. The SDG Index ranks countries' performance on results and policy on the 17 SDGs. For the environmental performance, the average score for SDG 7 (Affordable and Clean Energy), SDG 13 (Climate Action), SDG 14 (Life below Water) and SDG 15 (Life on Land) are calculated. Exclusion level: countries with an average score for SDGs 7,13,14 and 15 of less than 50. 4. Best in class approach to high performing countries to contribute to the Sustainable Development Goals Agenda Indicator: SDG Index, which presents where each country stands with regard to achieving the SDG 2030 Agenda throughout 99 indicators. Best in Class approach: The weighted average score of a.s.r. sovereign portfolio will be positioned within the first quartile of the SDG Index.

a.s.r. SRI Policy for External Providers

a.s.r. requests its External Providers to make the best possible effort to become signatories of the UN PRI and the UN Global Compact. Furthermore, a.s.r. engages its External Providers to comply as much as possible with a.s.r. SRI policy. ESG criteria are always taken into account in the selection process of External providers. There are certain providers (e.g. smaller boutiques or private equity houses) that do not have the internal capabilities to comply with the provisions of both sets of UN principles. With them, a.s.r. discusses their internal SRI practices and codes of conduct to make its own assessment. Exclusion of controversial weapons according to the Sustainable Investing Code of the Dutch Insurance Association is always a minimum requirement

No

I confirm I have read and understood the Accountability tab for SG 01

I confirm I have read and understood the Accountability tab for SG 01

SG 01 CC	Voluntary	Public	Descriptive	General
-----------------	------------------	---------------	--------------------	----------------

SG 01.6 CC	Indicate the climate-related risks and opportunities that have been identified and factored into the investment strategies and products, within the organisation's investment time horizon.
-------------------	---

Since 2016 a.s.r. has integrated climate change and energy transition as an explicit theme/driver within its strategic asset allocation and has taken measures to implement its commitment across the investment portfolio. a.s.r. has analysed and identified risks for the investment portfolio both bottom-up: taking into account stranded assets and changing business models in the mining and energy sectors, as top-down in its strategic asset allocation.

Pilot with Ortec finance

In order to be prepared for future possible climate scenarios and related risks and to help a.s.r. work towards setting Science Based Targets in line with the Paris Agreement, AVB has in 2018 engaged with Ortec Finance, other financial institutions and academia to integrate top down climate scenario analyses in its strategic asset allocation. The integration of these scenarios will enable a.s.r. to make better investment decisions for

allocations to asset classes, regions and sectors, and therefore to construct a more climate resilient investment portfolio. Current analyses focus mostly on bottom-up climate-related risk analyses and reporting and do not consider top-down integration via macro-economic (quantitative and qualitative) modelling. Considering a top-down analyses is important, however, because empirical research has shown that portfolio returns are determined to a large extent by investment decisions made at the strategic level. Linking scientific climate data to ALM/SAA tooling is a novel approach to mapping potential climate impacts on investment performance. It will enable us to report forward-looking, scenario-based disclosure along the lines of the framework set out by the TCFD.

Carbon Bubble

Bottom-up, four main risks have been identified: physical risks, transition risks, regulatory risks and social risks. For a more comprehensive overview on our research, please find our Carbon Bubble research on <https://www.asrnederland.nl/over-asr/duurzaam-ondernemen>

SG 01.7 CC	Indicate whether the organisation has assessed the likelihood and impact of these climate risks?
-----------------------------	--

Yes

SG 01.8 CC	Indicate the associated timescales linked to these risks and opportunities.
-----------------------------	---

For our scenario analysis with Ortec, a timescale until 2100 was taken into account. Additional scenarios and shocks were developed for over 30 years.

For our Strategic Asset Allocation (SAA), timeframes of 5 and 10 years are used.

No

SG 01.9 CC	Indicate whether the organisation publicly supports the TCFD?
-----------------------------	---

Yes

No

SG 01.10 CC	Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.
------------------------------	---

Yes

No

SG 01.11 CC	Describe how and over what time frame the organisation will implement an organisation-wide strategy that manages climate-related risks and opportunities.

--	--

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

	Investor relations
--	--------------------

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

	External managers or service providers
--	--

- Oversight/accountability for climate-related issues
- Assessment and management of climate-related issues
- No responsibility for climate-related issues

SG 07.6 CC	For board level roles for which have climate-related issues oversight/accountability or implementation responsibilities, indicate how these responsibilities are executed.
-----------------------------	--

The Board of Directors (CEO and CFO) are ultimately responsible for climate related issues. The non-financial target on measuring carbon emissions of the a.s.r. portfolio falls under the responsibility of the CFO. The CIO reports to ASR NL CFO. CIO and senior management staff have oversight on climate related issues through the quarterly ESG Management Committee. Implementation, measurement and monitoring of climate related issues lays with portfolio managers and dedicated ESG staff.

SG 07.7 CC	For the management-level roles that assess and manage climate-related issues, provide further information on the structure and process involved.
-----------------------------	--

See text above

SG 07.8 CC	Explain how the organisation engages external investment managers on the TCFD recommendations and its implementation.
-----------------------	---

- Incorporation of TCFD in Annual Report
- Incorporation of TCFD in regular client reporting
- Request that investment managers complete PRI Climate indicators
- Request responses to TCFD Fund Manager questions in the PRI Asset Owner guide

ESG issues in asset allocation

SG 13	Mandatory	Public	Descriptive	PRI 1
--------------	------------------	---------------	--------------------	--------------

SG 13.1	Indicate whether the organisation undertakes scenario analysis and/or modelling and provide a description of the scenario analysis (by asset class, sector, strategic asset allocation, etc.).
----------------	--

- Yes, to assess future ESG factors
- Yes, to assess future climate-related risks and opportunities

	Describe
--	----------

Together with Ortec Finance to be prepared for future possible climate scenarios and related risks and to help a.s.r. work towards setting SBTs in line with Paris Agreement, a.s.r. has started pilot to integrate top down climate scenario analyses in its strategic asset allocation.

- No, not to assess future ESG/climate-related issues

SG 13.2	Indicate if your organisation considers ESG issues in strategic asset allocation and/or allocation of assets between sectors or geographic markets.
----------------	---

	We do the following
--	---------------------

- Allocation between asset classes
- Determining fixed income duration
- Allocation of assets between geographic markets
- Sector weightings
- Other, specify
- We do not consider ESG issues in strategic asset allocation

SG 13 CC	Voluntary	Public	Descriptive	General
-----------------	------------------	---------------	--------------------	----------------

SG 13.4 CC	Describe how the organisation is using scenario analysis to manage climate-related risks and opportunities, including how the analysis has been interpreted, the results and any future plans.
-----------------------	--

- Initial assessment
- Incorporation into investment analysis

	Describe
--	----------

In order to be prepared for future possible climate scenarios and related risks and to help a.s.r. work towards setting Science Based Targets in line with the Paris Agreement, ASR Asset Management has engaged with Ortec Finance, other financial institutions and academia to integrate top down climate scenario analyses in its strategic asset allocation. The integration of these scenarios will enable a.s.r. to make better investment decisions for allocations to asset classes, regions and sectors, and therefore to construct a more climate resilient investment portfolio. Current analyses focus mostly on bottom-up climaterelated risk analyses and reporting and do not consider top-down integration via macro-economic (quantitative and qualitative) modelling. Considering a top-down analyses is important, however, because empirical research has shown that portfolio returns are determined to a large extent by investment decisions made at the strategic level. Linking scientific climate data to ALM/SAA tooling is a novel approach to mapping potential climate impacts on investment performance. It will enable us to report forward-looking, scenario-based disclosure along the lines of the framework set out by the TCFD.

SG 14.1	Some investment risks and opportunities arise as a result of long term trends. Indicate which of the following are considered.
---------	--

- Changing demographics
- Climate change
- Resource scarcity
- Technological developments
- Other, specify(1)
- Other, specify(2)
- None of the above

SG 14.2	Indicate which of the following activities you have undertaken to respond to climate change risk and opportunity
---------	--

- Established a climate change sensitive or climate change integrated asset allocation strategy
- Targeted low carbon or climate resilient investments

Specify the AUM invested in low carbon and climate resilient portfolios, funds, strategies or asset classes.

	trillions	billions	millions	thousands	hundreds
Total AUM		28	700	000	000
Currency	EUR				
Assets in USD		32	743	632	880

Specify the framework or taxonomy used.

This refers to the climate scenarios project undertaken in partnership with Ortec, where a.s.r. own account investment portfolio - excluding mortgages and real estate - is deemed to be "relatively robust positioned towards different climate change scenario's (1,5; 3; 4+ degrees)" as assessed in 2018, from a strategic asset allocation (top down) perspective.

Additionally a.s.r. has taken other measures from the bottom up approach which include carbon restrictions and energy transitions scoring to position the portfolio as climate resilient.

This AUM provided represents only the top down perspective and it is provided as a prudent approach.

- Phase out your investments in your fossil fuel holdings
- Reduced portfolio exposure to emissions intensive or fossil fuel holdings
- Used emissions data or analysis to inform investment decision making
- Sought climate change integration by companies
- Sought climate supportive policy from governments
- Other, specify

	other description
--	-------------------

New exclusion/engagement criteria regarding fossil fuels <w:br />Started to measure the exposure to emissions intensive or fossil fuel holdings -- Carbon footprint and energy transition

None of the above

SG 14.3	Indicate which of the following tools the organisation uses to manage climate-related risks and opportunities.
----------------	--

- Scenario analysis
- Disclosures on emissions risks to clients/trustees/management/beneficiaries
- Climate-related targets
- Encouraging internal and/or external portfolio managers to monitor emissions risks
- Emissions-risk monitoring and reporting are formalised into contracts when appointing managers
- Weighted average carbon intensity
- Carbon footprint (scope 1 and 2)
- Portfolio carbon footprint
- Total carbon emissions
- Carbon intensity
- Exposure to carbon-related assets
- Other emissions metrics
- Other, specify
- None of the above

SG 14.4	If you selected disclosure on emissions risks, list any specific climate related disclosure tools or frameworks that you used.
----------------	--

We published a Climate positioning paper where we give transparency on our methodology and we publish regularly our current carbon footprint, which is aligned to the recommendations of PCAF

SG 14 CC	Voluntary	Public		General
SG 14.6 CC	Please provide further details on these key metric(s) used to assess climate related risks and opportunities.			

Metric Type	Coverage	Purpose	Metric Unit	Metric Methodology

**SG 14.8
CC**

Indicate whether climate-related risks are integrated into overall risk management and explain the risks management processes for identifying, assessing, and managing climate-related risks.

- Process for climate-related risks is integrated into overall risk management
- Process for climate-related risks is not integrated into our overall risk management

Please describe

Currently in progress to include it on structural basis

**SG 14.9
CC**

Indicate whether the organisation undertakes active ownership activities to encourage TCFD adoption.

- Yes

Please describe

a.s.r. is involved in several climate-related engagements where SBT setting and disclosure on climate-related risks are included in the dialogue.

Reporting according to the TCFD recommendations is highly encouraged by ASR in the meetings with different stakeholders. Also, we had calls with peers already reporting to learn about their best practices and with providers to understand their offerings.

Also, a.s.r. will in principle vote in favour of TCFD related shareholder resolutions

- No, we do not engage

SG 15

Mandatory to Report Voluntary to Disclose
