

CLIMATE TRANSPARENCY REPORT 2020

NewAlpha Asset Management

About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-D5814BC2-39F8-4192-AB54-086DB4DC9D7E/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

New selection options have been added to this indicator. Please review your prefilled responses carefully.

SG 01.1 Indicate if you have an investment policy that covers your responsible investment approach.

SG 01 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
----------	---	--------	-------------	---------

SG 01.6 CC Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

- Yes
 No

Describe why your organisation has not yet gone through a process to identify transition and physical climate-related risks and opportunities.

Practically, in the fund of fund or investment advisory business, we select asset managers and invest in management teams. Therefore, extended due diligence on people, mindset, corporate and business values (such as how they conduct their own business) are critical to us.

NewAlpha is conscious of the climate-change related risks. However, we do not have yet the the ability to implement a specific climate-change policy within the scope and the time horizon of the mandates we managed for our clients.

SG 01.8 CC Indicate whether the organisation publicly supports the TCFD?

- Yes
 No

Explain the rationale

As a small investment manager (25 professionals), our resources are limited. We will express our support soon.

SG 01.9 CC Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

- Yes
 No

Describe how and over what time frame the organisation will implement an organisation-wide strategy that manages climate-related risks and opportunities.

We envision the next step to focus on the Climate issue: investors, corporations will have to measure their portfolio temperature and how they are aligned with carbon neutrality in 2050.

Specifically, on the 2°C Paris climate target, we will set a clear roadmap to reach our target of carbon neutrality by 2050. The Paris community is in the process of:

- Exploring methods to measure adequately the portfolio temperature and its evolution;
- Setting guidelines for investors to follow their commitments towards portfolio alignments and more generally sustainability of portfolios across several dimensions (AMF & ACPR to set clear measurements and reporting guidelines by year end). We will have to set the standard for our portfolio managers.
