RI TRANSPARENCY REPORT

2017

OpCapita LLP

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2017 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 03.1	Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.
---------	---

Yes

SG 03.2	Describe your policy on managing potential conflicts of interest in the investment process.
---------	---

Many potential investment conflicts are governed by OpCapita's existing regulatory requirements. However, please see below for examples of OpCapita's policy:

Co-Investment

Historically, due to the deal-by-deal nature of the firm, personnel have been permitted to invest on a deal-by-deal basis and/or different terms to those offered to Investors. However, employees were encouraged to invest in a personal capacity on a pari passu basis with the funds raised from clients in order to minimise the potential for conflicts. As the firm now has a fund structure, the potential conflict is further reduced and is mostly restricted to historic deals.

Allocation of time and resources and portfolio investments

Historically, the firm made investments on a deal-by-deal basis which posed a risk that employees would act in the best interests of an individual company rather than of the portfolio. This potential conflict is addressed through the remuneration policy of the firm, which is structured to ensure that employees both invest in and receive carried interest in all deals. Performance-based discretionary bonus is also material. As the firm now has a fund structure, the potential conflict is further reduced and is mostly restricted to historic deals.

No

SG 03.3	Additional information. [Optional]
---------	------------------------------------

OpCapita further has Conflict of Interest policy regarding business and personal conduct. Such conflicts occur when an individual's private interest interferes in any way -- or appears to interfere -- with the interests of OpCapita LLP.

A conflict situation may arise when an employee acts or has interests that may make it difficult to perform his or her work objectively and effectively. Conflicts of interests also arise when an employee, or a member of his or her family, receives improper personal benefits as a result of his or her position at OpCapita LLP.

Business decisions and actions must be based on the best interests of OpCapita LLP and its clients. Employees may not have outside interests that conflict or appear to conflict with the best interests of OpCapita LLP or its clients. Employees are expected to act solely for the benefit of the firm and its clients and not be influenced by a personal interest that may result from other individual or business concerns. Conflicts of interest are to be scrupulously avoided and, if unavoidable, must be disclosed to senior management.

Pre-investment (selection)

PE 07	Mandatory	Public	Gateway	PRI 1
-------	-----------	--------	---------	-------

PE 07.1 During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments.

- Yes

PE 07.2 Describe your organisation's approach to incorporating ESG issues in private equity investment selection.

The deal execution team has responsibility for performing an ESG analysis pre-acquisition which will be considered by the OpCapita Investment Committee as part of its investment decision making process. Material issues identified pre-acquisition will be incorporated into the post-acquisition 100-day operational change plans.

- Reporting standards, industry codes and certifications
- International initiatives, declarations or standards
- Engagements with stakeholders (e.g. customers and suppliers)
- Advice from external resources
- Other, specify
- We do not track this information

PE 8.2 Describe how this information is reported to, considered and documented by the Investment Committee or similar.

OpCapita incorporates ESG into the due diligence process when selecting investments and in the monitoring of portfolio companies. OpCapita will not buy a company that is environmentally or socially irresponsible. As OpCapita invests in companies which have either been mis-managed or under-managed there are often job losses as part of the turnaround plan. OpCapita aims to minimise the social impact of restructuring the companies whilst undertaking its fiduciary duties to investors. Environmental, Social and Governance considerations are considered in the monitoring of its investments and contributes to the decision making process.

The ESG analysis performed pre-acquisition will be considered by the OpCapita Investment Committee as part of its investment decision making process. Material issues identified pre-acquisition will be incorporated into the post-acquisition 100-day operational change plans, or may cause the OpCapita Investment Committee to terminate the process. All relevant information will be duly considered.
