# RI TRANSPARENCY REPORT

## 2020

### Share Capital

## About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

## Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

**PE 05.1** During due-diligence indicate if your organisation typically incorporates ESG issues when selecting private equity investments.

Yes

**PE 05.2** Describe your organisation's approach to incorporating ESG issues in private equity investment selection.

We developed a risk control list of ESG factors, including environmental, social and corporate governance factors, to screen out some companies with significant ESG risks.

There are 28 questions in the list, for example,

1. Does the target company conform to the company's investment strategy?
2. Does the target company involve environmental requirements?
3. Has the target company obtained the qualification license related to the main business? (such as environmental management system certification, scientific research patents, etc.)
4. Does the target company have a large number of related transactions?
5. Does the target company have anti-corruption and anti-bribery policies? , etc.

We do due diligence on each issue to identify thoroughly the ESG risk in the target company.

No
