RI TRANSPARENCY REPORT

2020

Hérens Quality Asset Management AG

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

- We do not cast our (proxy) votes directly and do not require external managers to vote on our behalf

OO 10.3 Indicate why you do not cast your votes

- Indicate why you do not cast your votes
 - As an asset manager, we do not have the ownership nor the rights for voting. With private clients we do provide advice on voting if required, however with institutional clients they do it themselves, following their internal policies and ESG guidelines.
- We do not cast our votes but provide substantive research and voting recommendations to our clients.

Fixed income Corporate (non-financial) – engagement

- We engage with companies on ESG factors via our staff, collaborations or service providers.
- We do not engage directly and do not require external managers to engage with companies on ESG factors. Please explain why you do not.

Please explain why you do not engage directly and do not require external managers to engage with companies on ESG factors.

Fixed income constitute a very minor portion of our AuM and are usually added to portfolios upon specific client wishes. We do, however, advise our clients to invest in bonds of Quality companies that pass our strict selection criteria, that already covers ESG as an integral part of the research.

Additional information. [Optional]

Corporate Quality Bonds have been part of our product offering since the start of the company and our approach to selection of corporate bonds is identical to the one applied to equity. To us, the underlying fundamental quality and sustainable operations of the issuer are of the primary importance. Our investment philosophy accross asset classes always remains unchanged and fully supported by internally generated research and analysis.

If you are invested in private debt and reporting on ratings is not relevant for you, please indicate below

OO FI 03.2 is not applicable as our internally managed fixed income assets are invested only in private debt.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Our investment approach is based on the belief that due to our systematic and economically sound investment process, with identical quality and valuation criteria in every region, we can find attractively valued quality companies at all times in all markets and that they offer a compelling investment opportunity. Our investment process is conducted purely bottom-up and uses a best-overall approach which is independent of market capitalization (with some liquidity restrictions) and sector. We follow a best-overall approach, because with the best-in-class approach, the quality of the sector itself is not examined, and too little attention is paid to the fact that sectors are subject to structural shifts. The vast majority of Quality companies can afford meeting ESG goals thanks to their fundamental strength, which allows them to act ethically and responsibly. Our Research team analyzes all portfolio candidates according to a defined standard SRI checklist. In addition, for designated ESG portfolios (e.g. church client) we apply client-specific criteria and negative lists.

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

Our standard ESG checklist includes assessment of Corporate Governance, environmental and social performance, as well as analysis of any legal cases or critical issues a company was/is/ could be involved. Companies with questionable ESG track record are subject to direct contact and a review by the Investment Committee. Portfolio holdings are monitored on a daily basis, which also covers SRI related issues.

Integration

In our belief, a stable and competent management team and responsible corporate strategy are critical characteristics for Quality companies. As a result, we use a variety of proprietary research and analytical tools, as well as external ESG sources, to aid in identifying key ESG issues for companies under assessment and potential investment candidates.

Screening

In our investment process, we strictly exclude companies that violate and do not comply with International Labor Organizations and Conventions of the United Nations Global Compact Principles. This includes violations of human rights, labor, environment and serious corruption issues. Additionally, we exclude certain industries, where according to our beliefs, humanitarian, social, ethical, or environmental concerns are involved. We consider businesses, associated with tobacco, arms and weapons, and thermal coal industries, as greatly irresponsible towards society and environment, and therefore exclude them from our investment universe.
