RI TRANSPARENCY REPORT

2019

Newbury Partners

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

- Other RI considerations, specify (2)

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Our investment strategy is to provide our investors with strong risk-adjusted returns and regular cash distributions by investing in private equity assets primarily through secondary market investments.

Key principles include:

- Risk management at the investment level through diligent underwriting and diversification
- Limited blind pool risk at the manager level by focusing on funded asset
- Asset selection based on the potential for growth and positive exit outcomes

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

When selecting investment to pursue, RI criteria are key factors in our investment decisions:

- We screen out potential investments with RI concerns
- We are significantly under-weight certain broad industry groups, where there are potential RI issues (e.g., energy, where we have macro-level climate change concerns)
- We maintain an active "exemptions" list for companies, funds, regions and counter-parties with which we will not do business

SG 12.1 Indicate whether your organisation uses investment consultants.

- Yes, we use investment consultants
- No, we do not use investment consultants.

SG 12.5 Indicate whether your organisation considers any of the following responsible investment factors in the monitoring of fiduciary managers

- Including responsible investment as a standard agenda item at performance review meetings
- Discussing whether the fiduciary manager has acted in accordance with your organisation’s overall investment beliefs/ strategy/ policy on responsible investment and ESG factors
- Reviewing the fiduciary manager’s PRI Transparency or Assessment reports
- Reviewing the fiduciary manager’s responsible investment reporting (excluding PRI generated reports)
- Reviewing ESG characteristics/factors used by the fiduciary manager in portfolio construction
- Reviewing the fiduciary manager’s incorporation approaches of ESG through-out asset classes
- Reviewing the impact of ESG factors on financial performance
- Encouraging your fiduciary managers to consider joining responsible investment initiatives/organisations or participate in educational or collaborative projects with other investors
- Including responsible investment criteria as a formal component of overall manager performance evaluation
- Reviewing the fiduciary manager’s ESG incorporation in external managers’ selection, appointment, monitoring
- Reviewing how ESG materiality is defined by the fiduciary manager
- Other general aspects of your monitoring; specify
- We do not consider responsible investment in the monitoring processes for fiduciary managers.

SG 12.6 Describe the approach you take to monitoring your fiduciary managers and the reason(s) for this approach [Optional].

We endeavor to attend the annual limited partners meetings for every GP in our portfolio, in addition to trying to hold one-on-one meetings with our managers whenever possible.

We also review the financial statements and underlying reporting for all of our investments on a regular basis.

- Yes, to assess future climate-related risks and opportunities
- No, not to assess future ESG/climate-related issues

SG 13.3

Additional information. [OPTIONAL]

We would very much like to incorporate ESG factors and scenario analysis into our transaction models. However, to date, we have not found enough relevant data or guidelines to specifically build these scenarios into our models. Instead, we simply apply high-level haircuts and make directional assessments on certain assess classes and sectors (e.g., less direct energy exposure in our portfolios, all else being equal)

Scope and process	Over the course of the past decade, we have pro-actively moved away from investing in portfolios with natural resources and heavy industrial company assets. This has occurred through transaction screening and manager selection, with an increased emphasis on integrating ESG into our investment process.
Outcomes	Compared to prior portfolios, we have reduced our exposure to these types of investments by approximately 70% - from roughly 25% of prior portfolios to roughly 8% currently.
