

# CLIMATE TRANSPARENCY REPORT 2020

Entropics Asset Management

# About the Climate-related Disclosure Indicators

Climate has been identified as a top priority for PRI signatories, with over 70% of asset owners reporting this as the most important long-term trend they are acting on.

The FSB Task Force's guidance on climate-related financial disclosure aim to create a single framework for disclosure on assessment and management of climate-related risk. The recommendations, supported by investors representing US\$22 trillion, identify four main disclosures, Governance, Strategy, Risk Management, Metrics and Targets, and include specific guidance for asset owners and managers.

As a result, the PRI introduced climate-related disclosure indicators that can be used to align with the TCFD recommendations in the 2020 PRI Reporting Framework.

## About this report

This report is an export of only the climate-related indicators from the 2020 Reporting Framework response. The full Public Transparency Report is available here (<https://reporting.unpri.org/surveys/PRI-reporting-framework-2020/-F7912A59-DCFE-41E1-9172-AB9186803CAE/79894dbc337a40828d895f9402aa63de/html/2/?lang=en&a=1>). It shows the responses to all the completed climate indicators, even those you chose to keep private. It is designed for your internal review or – if you wish - to share with your stakeholders.

The PRI will not publish this report on its website if you have designated your 2020 climate reporting as “private”. Otherwise, you will be able to access the Climate Transparency Report of your organisation and that of other signatories on the [PRI website](#) and on the [Data Portal](#).

To easily locate information, there is a **Recommendation index** which summarises the indicators that signatories complete and disclose. The report presents information exactly as it was reported as per signatory preference. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory are presented in this report.

## Investment policy

SG 01	Mandatory	Public	Core Assessed	General
-------	-----------	--------	---------------	---------

**New selection options have been added to this indicator. Please review your prefilled responses carefully.**

**SG 01.1** Indicate if you have an investment policy that covers your responsible investment approach.

SG 01 CC	Mandatory to Report Voluntary to Disclose	Public	Descriptive	General
----------	---	--------	-------------	---------

**SG 01.6 CC** Indicate whether your organisation has identified transition and physical climate-related risks and opportunities and factored this into the investment strategies and products, within the organisation's investment time horizon.

Yes

Describe the identified transition and physical climate-related risks and opportunities and how they have been factored into the investment strategies/products.

Due to the construction of ILS, other counterparty risks than pre-defined triggering events, are minimized. The dominant risk for Entropics and its shareholder is reputation risk, i.e. providing insurance protection for controversial purposes and, possibly, payments from bonds held for these purposes.

No

**SG 01.7 CC** Indicate whether the organisation has assessed the likelihood and impact of these climate risks?

Yes

Describe the associated timescales linked to these risks and opportunities.

For liquid cat bonds (Entropics investment universe), the likelihood of insurance events within the asset class is high (at least two events in the past five years). The affected bonds were excluded from Entropics' portfolio. Due to the internal screening process, the likelihood of insurance payments for controversial purposes is very low. The potential reputation impact is, however, very high.

No

**SG 01.8 CC** Indicate whether the organisation publicly supports the TCFD?

Yes

No

**SG 01.9 CC** Indicate whether there is an organisation-wide strategy in place to identify and manage material climate-related risks and opportunities.

Yes
