RI TRANSPARENCY REPORT

2020

Riparian Capital Partners Pty Ltd

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

SG 01.4

Describe your organisation's investment principles and overall investment strategy, interpretation of fiduciary (or equivalent) duties, and how they consider ESG factors and real economy impact.

Riparian Capital Partners ('RCP') is a specialist water, agriculture and food investment firm. Our objective is to deliver competitive, sustainable returns to our stakeholders via long term investments across the agricultural sector. Clear ESG objectives are embedded in our investment approach and processes. RCP focuses on investments backed by real assets critical to the production of essential goods - water, farmland, agricultural infrastructure and agribusinesses. Characterised by long term production and investment lifecycles where patient capital is required and rewarded, RCP has clear and proven investment strategies to unlock and sustainably deliver value for our stakeholders.

The Investment Committee on delegation from the Board assumes fiduciary duties and responsibilities including but not limited to:

Investment Activities Review and approve investment strategies

Ensure adequate portfolio management personnel and other resources are in place to meet established and agreed upon investment objectives

Monitor deployment of capital against mandates and ensure compliance with investment mandates

Monitor deployment of mandates to portfolio construction guidelines

Monitor investment performance and ESG of investments

Approve new transitions and divestments of existing portfolio assets Identify principal risks to investment strategies

Review and approve distributions from investment vehicles

SG 01.5

Provide a brief description of the key elements, any variations or exceptions to your investment policy that covers your responsible investment approach. [Optional]

RCP is committed to implementing, monitoring and reviewing Environmental, Social and Governance (ESG) practices across the business and across assets managed by the firm on an ongoing basis. Our ambition is to continuously enhance our understanding of sustainability and in doing so advance our ESG practices. RCPs ability to successfully manage ESG factors is directly interlinked with our ability to sustainably deliver attractive returns to our investors. In our view, there is no bifurcation between investment returns and sustainability but rather as long-term investors in agriculture we are incentivised to advance our ESG practices overtime.

RCP is committed to:

- performing appropriate due diligence on environmental and social impacts associated with investments;
- providing safe workplace environments;
- ensuring that appropriate mitigation strategies are employed and monitored throughout an investment's lifecycle; and
- providing appropriate governance structures for investments on an ongoing basis.

This policy will be monitored by the RCP Risk Committee on a periodic basis.

SG 03.1 Indicate if your organisation has a policy on managing potential conflicts of interest in the investment process.

- Yes

SG 03.2 Describe your policy on managing potential conflicts of interest in the investment process.

RCP's position is that transparency of interest is paramount and that it is better to err on over-disclosure rather than under-disclosure so that the client is fully aware of the interests which we or our representatives may have in relation to the service being provided. In all instances where there is a serious conflict of interest the client is to be informed at the earliest opportunity that we have a conflict of interest which is of a nature to prevent it from acting (or continuing to act) for the client on a particular matter. There is no specific requirement for us to detail the nature of the conflict to the client. It is sufficient nevertheless that we initially form the view that discontinuing the client relationship for this particular matter is the appropriate course. In other cases where the conflict of interest is not prohibitive of us commencing or continuing with a client relationship, the process of managing the conflict may include disclosing the nature of the conflict. We should ensure that clients are adequately informed about any conflicts of interest that may affect the provision of financial services to them. (From RCP Conflict of Interest Policy 3.4)
