RI TRANSPARENCY REPORT

2020

Amalgamated Bank

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2020 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
Ⓜ	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

OO 11.4 Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

Amalgamated Bank's externally managed assets are primarily managed by sub-advisors that have aligned values with our mission statement. Incorporating ESG factors and principles into an investment strategy or through active ownership through corporate governance is discussed when selecting outside investment managers and through investment reviews. When launching product specific ESG strategies, we incorporate a specific review of the investment manager's incorporation of ESG metrics in their process.

Our proxy voting guidelines provide a very detailed statement of the approach that we take on specific ESG issues, and we are a leader among funds seeking to promote ESG goals through direct engagement with portfolio companies through shareholder proposals, letter writing and other forms of engagement. Given our history, all managers identified here are attuned to and aware of the importance of ESG issues in portfolio companies.

SG 07.3

SG 07.4	Additional information. [Optional]
----------------	------------------------------------

This question is not applicable to our business plan because our funds are primarily indexed, so we are not structured to have a dedicated staff that is engaged in stock picking, screening and monitoring compliance. Our core strategy allows us maximum flexibility to engage companies on ESG issues across the market, with responsibilities on ESG issues thus spread over a number of personnel. This type of activism has been an integral part of our identity since our founding over 20 years ago. Our funds have actively sought to improve corporate performance through engagements with hundreds of portfolio companies on a range of ESG issues, using a variety of strategies that would simply not be possible if we had screened companies out of the portfolio.
