

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the [PRI website](#), ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the 2019 reporting cycle. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information. As a result, the reports can be extensive. However, to help easily locate information, there is a **Principles index** which highlights where the information can be found and summarises the indicators that signatories complete and disclose.

Understanding the Principles Index

The Principles Index summarises the response status for the individual indicators and modules and shows how these relate to the six [Principles for Responsible Investment](#). It can be used by stakeholders as an 'at-a-glance' summary of reported information and to identify particular themes or areas of interest.

Indicators can refer to one or more Principles. Some indicators are not specific to any Principle. These are highlighted in the 'General' column. When multiple Principles are covered across numerous indicators, in order to avoid repetition, only the main Principle covered is highlighted.

All indicators within a module are presented below. The status of indicators is shown with the following symbols:

Symbol	Status
✓	The signatory has completed all mandatory parts of this indicator
☑	The signatory has completed some parts of this indicator
🔒	This indicator was not relevant for this signatory
-	The signatory did not complete any part of this indicator
⚠	The signatory has flagged this indicator for internal review

Within the table, indicators marked in blue are mandatory to complete. Indicators marked in grey are voluntary to complete.

Provide a brief description of how your organisation includes responsible investment considerations in your investment manager selection, appointment and monitoring processes.

When selecting any new manager and reviewing existing managers we look at ESG credentials.

This has led to recent manager changes such as terminating AMP and appointing Australian Ethical for RI/ESG/SRI investment option, recommending Robeco for EM equities (their ESG fund) Adding monies to Energy Infrastructure Trust (Wind Farms, renewable energy etc Infra) and Palisade (Infra) and Gardior (has elements of renewable power Infra)

Additional information. [Optional]

At Australian Catholic Superannuation we take our obligation to members and to promote best practice in ESG and RI very seriously. We have investments in clean energy, renewable energy and a separate investment option for those who wish to be stronger in this area. When selecting managers we specifically ask that all ESG is holistically managed as part of their investment process. We are in the process of restructuring our property and infrastructure managers and all new appointments will be strictly vetted to ensure that as well as being a 'good' manager that they are signatories to UNPRI and are good corporate citizens. Specifically we have a preference for managers that have been rated 'green' (property) and have a proven track record in this area (eg Generation as a PE manager, Sustainable Agriculture investments) etc.

We are currently assessing 'impact' and 'social impact' investing.

Additionally in FY 2018 we have appointed two additional ESG managers. Robeco to manager Emerging Market Equities and were a cornerstone investor in Australian Renewables Infrastructure Fund

Our quant strategies in Australian listed equity are of such low tracking error that you may almost think of them as passive so best way of thinking of our listed equities is totally passive for developed market international equities and active for emerging markets and Australia.

----------------	------------------------------------

ACSRF has a formal Conflicts Policy in accordance with government regulations. The conflicts policy covers circumstances where one or all of the interests of members are inconsistent with, or diverge from, some or all of the interests of the Trustee or its representatives. In relation to investments in particular, any member of the Investment Committee who has an actual or potential conflict of interest in relation to any item on the agenda must declare that conflict at the start of the meeting. The Committee member must disclose all relevant information about the conflict in such manner and form as determined by the other Committee members.

Where a conflict of interest is declared, the Committee must assess the conflict to determine its materiality and significance to any relevant agenda item and decide what action should be taken i.e. abstention from the relevant part of the meeting, abstention from voting or no action. The details of any declared conflicts and the Committee's decision must be recorded in the minutes and in the conflicts register. The fund maintains a register of duties, financial interests and conflicts. Directors are required to declare any conflict of interests at every Trustee meeting.

The Trustee and Investment Committee (IC) have an Investment Governance Framework which provides guidelines to manage investments to protect the interests, and meet the reasonable expectations, of beneficiaries. It sets out the selection and monitoring process for investment managers. Monitoring is done on a quantitative and qualitative basis. The IC meets regularly with managers to discuss any issues.

Brief description and measures of investment

This is actually a private equity investment in the Generation Climate Solutions Fund.

They invest in private equity, restricted public equity and unrestricted public equity. This strategy is focused exclusively on deploying capital into companies that are part of the transition from a high-carbon to a low-carbon economy. Generation has prioritized four initial areas of focus for the Climate Solutions product: Renewable Energy Generation and Distribution, Energy Efficiency and Demand Destruction, Carbon Markets and Climate-Related Financial Services Solutions for the Biomass Economy.

ACSRF also invests in an Energy Infrastructure Trust which has investments in wind farms among other energy assets and is a cornerstone investor in Australian renewable Infrastructure Trust

While ESG performance is not formally included in manager performance evaluation, it is included on an informal basis.

Equities managers report every quarter on ESG engagement and proxy voting activities for the quarter. Managers provide information on why they may vote against resolutions or abstain.

ACS relies on ACSI to perform engagement activities on its behalf.

This is extremely hard to track as the standard format reports do not provide summary information.

SAM 02.3 Indicate the selection process and its ESG/RI components

- Review ESG/RI responses to RfP, RfI, DDQ etc.
- Review responses to PRI's Limited Partners' Responsible Investment Due Diligence Questionnaire (LP DDQ)
